Title: Hemovigilance: is it making a difference to safety in the transfusion chain?

Issue Date: 2013-03-19

**Hemovigilance:
is it making a difference to safety
in the transfusion chain?**

Johanna C. Wiersum-Osselton

TRIP Promotiereeks

Stichting TRIP (Transfusie- en transplantatiereacties in patiënten) heeft ten doel het bevorderen van hemovigilantie en biovigilantie in Nederland. TRIP biedt promovendi die relevant onderzoek hebben verricht de mogelijkheid hun dissertatie te publiceren in de TRIP promotiereeks.

Hemovigilance: is it making a difference to safety in the transfusion chain?

The work reported in this thesis was supported by

Sanquin Blood Supply study grant PPOC 08-008 for study on G-CSF mobilised donors.

Printing of this thesis was financially supported by

Stichting TRIP (Transfusie- en transplantatiereacties in patiënten)
Sanquin Blood Supply
Haga Teaching Hospital

Dreischor village. Stone marking the water level in the 1953 flood, after which dykes were strengthened and dams constructed. Hemovigilance is about learning from what went wrong in the past and taking measures to increase safety.

**Hemovigilance:
is it making a difference to safety
in the transfusion chain?**

(met een samenvatting in het Nederlands)

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 19 maart 2013
klokke 15.00 uur

door

Johanna Caroline Wiersum-Osselton
geboren te Southampton (Verenigd Koninkrijk)
in 1956

PROMOTIECOMMISSIE:

Promotor:	Prof. Dr. A. Brand	
Co-promotores:	Dr. M.R. Schipperus Dr. J.G. van der Bom	HagaZiekenhuis, Den Haag <i>en</i> TRIP
Leden:	Prof. M.F. Murphy Prof. Dr. Mr. D.P. Engberts Prof. Dr. F.R. Rosendaal	Oxford University, UK

Affiliations

The research described in this thesis was conducted at TRIP Dutch National Hemovigilance Office, The Hague, at Sanquin Blood Supply Donor Services Unit, at Haga Teaching Hospital, The Hague and at Leiden University Medical Center in The Netherlands.

CONTENTS

	Introduction	7
Chapter 1	Introduction	9
	Part 1: Donor (hemo)vigilance	23
Chapter 2	Donor vigilance – what are we doing about it?	25
Chapter 3	Risk factors for donor complications at first and repeat whole blood donation: cohort study with assessment of the impact on donor return	35
Chapter 4	Clinical outcomes after peripheral blood stem cell donation by related donors: a Dutch single-center cohort study	53
	Part 2: “Recipient” hemovigilance	71
Chapter 5	Clinical predictors of alloimmunization after red blood cell transfusion	73
Chapter 6	Male-only fresh-frozen plasma for transfusion-related acute lung injury prevention: before-and-after comparative cohort study	85
Chapter 7	Variation between hospitals in rates of reported transfusion reactions: is a high reporting rate an indicator of safer transfusion?	99
	Conclusion	117
Chapter 8	Final discussion: Is hemovigilance making a difference to transfusion safety?	119
	Summary	137
	Samenvatting	139
	Glossary	141
	List of co-authors	143
	Dankwoord	145
	Curriculum Vitae	147
	List of publications	149
