Magnetic Resonance Imaging

studies on

Neuropsychiatric Systemic Lupus Erythematosus

Magnetic Resonance Imaging
studies on
Neuropsychiatric Systemic Lupus Erythematosus

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 31 mei 2006
klokke 16.15 uur

door

Stefanus Cornelis Antonius Steens
geboren te Leidschendam
in 1977

Promotiecommissie

Promotores: Prof. dr. M.A. van Buchem
Prof. dr. T.W.J. Huizinga

Referent: Prof. dr. P.S. Tofts (Institute of Neurology, University College London, UK)

Overige leden: Prof. dr. R.A.C. Roos
Dr. P.A.M. Hofman (Academisch Ziekenhuis Maastricht)

Contents

1. Introduction and aims	7
2. Imaging modalities in CNS-lupus	13
3. Sources of variation in multi-centre MTR histogram studies - body-coil transmission eliminates inter-centre differences	25
4. Reproducibility of brain ADC histograms	47
5. The effect of corticosteroid medication on quantitative magnetic resonance parameters of the brain	59
6. Detection of change in CNS involvement in neuropsychiatric SLE: a magnetization transfer study	71
7. Selective gray matter damage in neuropsychiatric lupus - a magnetization transfer imaging study	81
8. Multisequence magnetic resonance imaging study of neuropsychiatric systemic lupus erythematosus	91
9. Association between microscopic brain damage as indicated by magnetization transfer imaging and anticardiolipin antibodies in neuropsychiatric lupus	105
10. MRI manifestations of brain involvement in systemic lupus erythematosus: an inventory	119
11. A neuroimaging follow-up study of a patient with juvenile central nervous system systemic lupus erythematosus	137
12. Summary	146
Nederlandse samenvatting	150
List of publications	154
Curriculum Vitae	155
