Title: Cultural landscapes, social networks and historical trajectories: A data-rich synthesis of Early Bronze Age networks (c. 2200-1700 BC) in Abruzzo and Lazio (Central Italy)

Issue Date: 2012-11-15

Cultural landscapes, social networks and historical trajectories:

A data-rich synthesis of Early Bronze Age
networks (c. 2200-1700 BC) in Abruzzo and Lazio
(Central Italy)

Proefschrift
ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 15 november 2012
klokke 15.00 uur

door

Ericus Anthonius van Rossenberg
geboren te Ter Aar
in 1974

Promotiecommissie

Promotores: Prof. dr. H. Fokkens
Prof. dr. R.H.A. Corbey

Overige leden: Prof. dr. W.J.H. Willems, decaan
Prof. dr. P.A.J. Attema, Rijksuniversiteit Groningen

Contents

Chapter 1	
Different Bronze Ages: thick, rich, slow	1
1.1 The trajectory of a data-rich (syn)thesis	1
1.2 Bronze Age studies in Central Italy	2
1.2.1 Between Europe and the Mediterranean	3
1.2.2 Emancipating the Early Bronze Age	4
1.3 Different Bronze Ages: the case of Abruzzo and Lazio	6
1.3.1 Geographical considerations	6
1.3.2 Chronological considerations	9
1.3.3 Archaeological records	10
1.4 Thesis outline: a multi-dimensional jigsaw	11
Chapter 2	
Archaeological synthesis of Bronze Age networks and trajectories	17
2.1 Cultural landscapes: uncertainties and controversies	17
2.1.1 Archaeological synthesis and landscape studies	18
2.1.2 Place-making: polythetic classification, deposition and the archaeological record	20
Polythetic classification as relational methodology	20
From polythetic classification to place-making	22
Place-making: cultural landscapes, deposition and the question of ritual	23
Notions of place and archaeological records	24
Object biographies and notions of place	25
Bronze Age exchange networks: metalwork and movement	26
2.1.3 A network approach to cultural landscapes: relational notions of place	28
Relational ontologies	28
Personhood and ancestorhood	29
Sacred landscapes, natural places and liminality	31
Relational notions of place and period-specific archaeological records	33
Relational source criticism	35
2.2 Social networks: uncertainties and controversies	37
2.2.1 Connectivity and social network analysis	38
2.2.2 Reconstructing connectivity, regional differentiation and cultural boundaries	39
Typochronological fuzziness	39
Typochronological networks (or typo-networks)	40
From polythetic classification and typo-networks to small-worlds	42
Regional differentiation and boundary work	43
Networks and boundaries	44
2.2.3 Social reproduction and ‘multi-sited’ social formations	45
Appropriating Latour	46
The issue of scalarity: social life as multi-sited	47
Trajectories and rhythms of social reproduction	49
Annual cycle	49
Domestic cycle	49
Community formation	50
Chapter 3	
Introducing the Early Bronze Age in Central Italy	53
3.1 Archaeological records	54
3.2 Typology of ceramics: relative chronology and regionalisation	55

CONTENTS

3.2.1 Typochronology, ceramic connections and typo-networks	55
Copper Age-EBA1 transition	57
EBA1	59
EBA2	60
3.2.2 Regionalisation and cultural groups	62
Cultural landscapes and social networks	63
Cultural boundaries: Abruzzo and Lazio	65
3.3 Absolute chronology: radiocarbon dates from archaeological contexts	67
Copper Age-EBA1 transition	67
Absolute dates from EBA contexts	70
3.4 Reconstructions of climate and environment	72
Climatic ‘dry event’ and deforestation	73
Tephrochronology: the Avellino eruption	76
Environmental ‘events’ and cultural landscapes	77
 Chapter 4	
From copper to bronze: deposition, exchange and production of Early Bronze Age metalwork	79
4.1 Hoards on the horizon: typochronologies, spatial distributions and metallurgical spheres	80
4.1.1 Typochronologies of EBA hoards in Central Italy	80
4.1.2 Spatial distributions and metallurgical spheres: a diachronic comparison with ceramic connectivity	82
Ingot hoards and copper sources	83
Horizon I	84
Horizon II	84
Horizon III	89
Axes and ingots	90
Metal-hilted daggers (“Vollgriffdolche”)	92
4.1.3 The interpretation of hoards	96
Axe and/or ingot hoards	98
Dagger hoards	100
4.2 Metalwork and notions of place: cultural landscapes and natural places	102
4.2.1 Coastal Abruzzo	103
4.2.2 The intermontane region	106
4.2.3 Coastal Lazio	107
Northern Lazio	108
Southern Lazio	110
4.2.4 Cultural landscapes and natural places	112
4.3 Producing metalwork: classes by composition and size	115
4.3.1 Copper metalwork	115
Axes	115
Daggers and halberds	117
Metallurgical knowledge	118
4.3.2 Early bronze metalwork	120
Axes	120
Daggers	122
Metallurgical knowledge	123
4.3.3 Size distributions	125
Halberds and daggers	125
Axes	126
4.4 Connectivity by metalwork: exchange networks and metallurgical spheres	128
4.4.1 Copper Age-EBA1 transition	128
4.4.2 EBA1 (horizon II)	131

4.4.3 EBA2 (horizon III)	134
The ‘Tuscan’ sphere and coastal Lazio	135
Cross-Appennine connectivity and coastal Abruzzo	137
4.5 A summary and multi-sited questions	140
Chapter 5	
Doing away with the dead: the low archaeological visibility of Early Bronze Age burial	145
5.1 Placing the dead: cultural landscapes and notions of ancestorhood	146
5.1.1 Coastal Abruzzo	147
5.1.2 The intermontane region	147
5.1.3 Coastal Lazio	149
Northernmost Lazio	150
‘Southern’ northern Lazio	152
Southern Lazio	154
5.1.4 Cultural landscapes and ancestral place-making	156
Copper Age traditions of burial	156
EBA1 traditions of burial	159
EBA2 traditions of burial	159
5.2 Secondary burial and social networks: connectivity by human remains	160
5.2.1 Funerary practices: selective or non-selective?	161
5.2.2 Connected to the past: making ancestors or places?	164
Copper Age	165
Early Bronze Age	167
5.2.3 From centralised to redistributed ancestorhood	169
5.3 A summary and multi-sited questions	170
Chapter 6	
Underground place-making: Early Bronze Age cave use	173
6.1 Caves in cultural landscapes: spatial distributions and trajectories	174
6.1.1 Coastal Abruzzo	174
6.1.2 The intermontane region	176
The province of Rieti	177
The Upper Liri valley	177
The Fucino basin	177
Upper stretches of ‘Adriatic’ rivers	179
6.1.3 Coastal Lazio	179
The middle-lower Fiora valley	180
‘Southern’ northern Lazio	181
The Aniene valley	181
The province of Frosinone	182
The province of Latina	183
6.1.4 Access to the past: caves as prior places	183
6.2 Caves as collectors and connectors: ceramics deposition as ritual practice	186
6.2.1 Polythetic classification	186
Full cave assemblages	186
Intermediate assemblages	188
Limited cave assemblages	188
6.2.2 Nodes in networks and flows of substances	189
Cave use and connectivity	190
Underground place-making	191
6.3 A summary and multi-sited questions	193

CONTENTS

Chapter 7	
Changing places: Early Bronze Age settlement patterns and mobility	195
7.1 Mind the gaps: settlements and other open-air sites in cultural landscapes	196
7.1.1 Coastal Abruzzo	197
7.1.2 The intermontane region	199
The Aterno-Tirino cluster	200
The Fucino basin	201
Copper Age-EBA1	201
EBA2	204
The province of Rieti	206
7.1.3 Northern Lazio	207
Northernmost Lazio	207
Copper Age-EBA1	207
EBA2	209
‘Southern’ northern Lazio	211
Copper Age-EBA1	211
EBA2	214
7.1.4 Southern Lazio	215
‘Northern’ southern Lazio	215
Copper Age-EBA1	215
EBA2	216
The provinces of Latina and Frosinone	219
Copper Age-EBA1	219
EBA2	220
7.2 Typochronological networks: a diachronic perspective on regional connectivity and settlement patterns	221
7.2.1 Copper Age-EBA1 connectivity	222
7.2.2 EBA2 connectivity	224
Bronze Age Pompeii: a cautionary tale	226
7.3 The specifics of open-air sites: polythetic classification and structural remains	227
7.3.1 Polythetic classification and interpretation	227
Complete vessels and metalwork	228
Quernstones & mullers	230
Spindle-whorls and arrowheads	231
Lithics	232
Organic remains	232
7.3.2 Structural remains and features	233
EBA settlements: research and cultural biases	234
7.4 Subsistence strategies and settlement patterns: the issue of mobility and connectivity	235
7.4.1 Husbandry or herding: pastoralist signatures?	235
Copper Age-EBA1	236
Dogs and horses	239
EBA2	239
Pastoralist mobility	241
7.4.2 Hunting patterns	242
Copper Age-EBA1	242
EBA2	245
Hunting and mobility	245
7.4.3 Agricultural produce and wild fruits	247
Copper Age-EBA1	247
EBA2	248
7.4.4 Subsistence and settlement: mobility and connectivity	249

Copper Age-EBA1	250
EBA2	251
7.5 A summary and multi-sited questions	252
Chapter 8	
The first fifteen to twenty generations: a synthesis of Early Bronze Age cultural landscapes and social networks	255
8.1 Archaeological records: absence of evidence or evidence of absence?	255
8.2 Cultural landscapes, social spheres and connectivity: outlines of a synthesis	257
Copper Age-EBA1 transition	257
EBA1	259
EBA2	262
8.3 Place-making and cosmologies: working with the bias towards deposition	265
Differentiating the subsurface	265
Situating metalwork: from the subsurface to the surface and back	267
8.4 Historical trajectories: social reproduction and transformation	271
Demographics and network changes	271
Metal-work: connectivity and boundary work	272
Conditions of possibility for the Middle Bronze Age	274
Chapter 9	
Thick, rich, slow: implications for the study of Bronze Age trajectories	275
9.1 Diachronic comparison: transitions as trajectories	277
9.1.1 Archaeological records as a proxy for network changes	278
From Early to Middle Bronze Age networks	278
9.1.2 Time-transgressive issues and scenarios	280
Ceramics typochronologies	281
Metalwork typochronologies	284
9.2 Reassembling the Early-Middle Bronze Age transition	287
9.2.1 The emergent Grotta Nuova sphere	288
Scaling up	293
9.2.2 The emergent Protoappenninico sphere	298
Scaling down and up again	301
9.2.3 The Early-Middle Bronze Age transition as a trajectory	303
The bias towards deposition and network changes	304
Methodological implications	305
9.3 Implications for the study of Bronze Age trajectories	307
From Bell Beaker phenomenon to Early Bronze Age ‘metal-work’	308
From ‘earlier’ to ‘later’ Bronze Age networks	309
9.3.2 Getting your networks right: the Bronze Age as an archipelago	312
Bibliography	315
Appendix 1 An overview of Early Bronze Age metalwork in Abruzzo and Lazio	361
Appendix 2 An overview of Early Bronze Age funerary contexts in Abruzzo and Lazio	377
Appendix 3 An overview of Early Bronze Age cave use in Abruzzo and Lazio	385
Appendix 4 An overview of Early Bronze Age settlements and other open-air sites in Abruzzo and Lazio	393
Samenvatting	425
Acknowledgements	427
Curriculum vitae	428

List of figures

- Figure 1.1: map showing the administrative regions of Italy, highlighting the five regions that make up Central Italy, including Abruzzo and Lazio.
- Figure 1.2: map highlighting the central position of the Italian peninsula with respect to Europe, the western and eastern Mediterranean and North Africa.
- Figure 1.3: map of the Italian peninsula, highlighting the location of Abruzzo and Lazio with respect to the APENNINE MOUNTAINS.
- Figure 1.4: map showing the constituent administrative provinces of Abruzzo and Lazio and the regions used as units of analysis in this study.
- Figure 3.1: map showing the ‘typo-networks’ of subphase BA1A in Central Italy based on (a) vessel types and (b) decorations.
- Figure 3.2: map with ‘typo-network’ of subphase BA1B in Central Italy based on vessel types.
- Figure 3.3: map with ‘typo-networks’ of subphase BA2 in Central Italy based on (a) vessel types exclusive to caves and LAGO DI MEZZANO and (b) vessel types that include open-air sites.
- Figure 3.4: map with ‘typo-network’ of subphase BA2 in Central Italy based on handle types.
- Figure 3.5: map with cultural groups in Central Italy delineated on the basis of EBA ceramics typology.
- Figure 3.6: map with reconstructed cultural groups in Central Italy in relation to site distributions (a) in EBA1 and (b) in EBA2.
- Figure 3.7: map with reconstructed cultural groups in Central Italy in relation to the spatial distribution of EBA hoards of metalwork.
- Figure 3.8: multi-plot of radiocarbon dates (4000-3600 BP) for archaeological contexts in Abruzzo and Lazio with OxCal 4.1.
- Figure 3.9: multi-plot of radiocarbon dates (3600-3300 BP) for archaeological contexts in Abruzzo and Lazio with OxCal 4.1.
- Figure 3.10: multi-plot of radiocarbon dates (3600-3300 BP) from archaeological contexts in other regions in Central Italy than Abruzzo and Lazio with OxCal 4.1.
- Figure 3.11: map showing the location of intermontane lake basins, crater lakes and wetland areas in Abruzzo and Lazio with reconstructions of climate and environment.
- Figure 3.12: multi-plot of radiocarbon dates related to ‘dry event’ signatures from Lazio with OxCal 4.1.
- Figure 3.13: multi-plot of radiocarbon dates of archaeological contexts related to the Avellino eruption of SOMMA-VESUVIUS, with recent robust date (Sevink et al. 2011) as a marker, with OxCal 4.1.
- Figure 4.1: map showing the spatial distribution of hoards with (or consisting solely of) ingots in Central Italy in relation to reconstructed EBA cultural groups and selected copper sources.
- Figure 4.2: map showing ‘horizon I’ axe hoards and the typo-network of subphase BA1A in Central Italy.
- Figure 4.3: map showing (a) ‘horizon II’ axe hoards and the typo-network of subphase BA1B in Central Italy and (b) compositional similarity and postulated metallurgical spheres.
- Figure 4.4: map showing (a) ‘horizon II-III’ and ‘horizon III’ axe and dagger hoards and the typo-network of subphase BA2 in Central Italy and (b) compositional similarity and postulated metallurgical spheres.
- Figure 4.5: map showing the spatial distributions of Early Bronze Age metalwork in Abruzzo and Lazio (including isolated finds of Copper Age metalwork).
- Figure 4.6: map showing the diachronic dimensions of the spatial distributions of Early Bronze Age metalwork in Abruzzo and Lazio (including isolated finds of Copper Age metalwork).
- Figure 4.7: map showing the larger metallurgical sphere on the Tyrrhenian side of the peninsula based on the high degree of compositional similarity of copper metalwork.
- Figure 4.8: map showing the relationships between the postulated ‘horizon II’ metallurgical spheres based on axe hoards in Central Italy and single finds from Abruzzo and Lazio.
- Figure 4.9: map showing the relationships between the postulated ‘horizon III’ metallurgical spheres based on axe and dagger hoards in Central Italy and single finds from Abruzzo and Lazio.
- Figure 5.1: map showing the spatial distributions and types of (potentially) EBA funerary contexts in Abruzzo and Lazio.
- Figure 5.2: map showing the spatial distributions and types of definite contexts of EBA1 burial in Abruzzo and Lazio, with ‘ancestral’ connotations of prior place highlighted, including EBA1 funerary cave use in southern Tuscany.

- Figure 5.3: map showing the spatial distributions and types of definite contexts of EBA2 burial in Abruzzo and Lazio, with ‘ancestral’ connotations of prior place highlighted, including EBA2 funerary cave use in southern Tuscany.
- Figure 6.1: map showing the spatial distributions of (potentially) EBA cave use in Abruzzo and Lazio.
- Figure 6.2: map showing the spatial distribution of EBA1 cave use (with Copper Age prior history highlighted) in Abruzzo and Lazio, including EBA1 cave use in southern Tuscany and Umbria.
- Figure 6.3: map showing the spatial distribution of EBA2 cave use (with Copper Age and/or EBA1 prior history highlighted) in Abruzzo and Lazio, including EBA2 cave use in southern Tuscany and Umbria.
- Figure 7.1. map showing the spatial distributions of EBA open-air sites in Abruzzo and Lazio.
- Figure 7.2: map showing the distributions of open-air and cave sites dated to the Copper Age and EBA1 [subphase BA1A] in the FUCINO BASIN, with ceramic connections.
- Figure 7.3: map showing the distributions of open-air and cave sites dated to subphases BA1A and BA1B in the FUCINO BASIN, with ceramic connections.
- Figure 7.4: map showing the distributions of open-air and cave sites dated to subphases BA1B and BA2 in the FUCINO BASIN, with ceramic connections.
- Figure 7.5: map showing the regional ‘typo-network’ of subphase BA1A in Abruzzo and Lazio.
- Figure 7.6: map showing the regional ‘typo-network’ of subphase BA1B in Abruzzo and Lazio.
- Figure 7.7: map showing the regional ‘typo-network’ of subphases BA1A, BA1 & BA1B in Abruzzo and Lazio.
- Figure 7.8. map showing the regional EBA2 ‘typo-network’ in Abruzzo and Lazio.
- Figure 7.9: map showing the distributions of so-called “Luni Tre Erci-Norchia” decorated ceramics, assemblages with “Palma di Campania” ceramics and EBA2 metalwork from ‘coastal’ Lazio.
- Figure 8.1: multi-sited map showing the distributions of Copper Age cave use and ‘isolated’ finds of copper metalwork from Abruzzo and Lazio.
- Figure 8.2: multi-sited map of cultural landscapes in Abruzzo and Lazio in subphase BA1A.
- Figure 8.3: multi-sited map of cultural landscapes in Abruzzo and Lazio in subphase BA1B.
- Figure 8.4: multi-sited map of cultural landscapes in Abruzzo and Lazio in EBA2.
- Figure 9.1a: ‘typo-network’ based on vessel types attributed to subphase BM1A, in relation to reconstructed cultural groups within the Central Italian “Grotta Nuova” sphere.
- Figure 9.1b: ‘time-transgressive’ scenario for regional differentiation in typo-chronological sequences ‘at’ the Early-Middle Bronze Age transition.
- Figure 9.2a: completed ‘typo-network’ based on vessel and handle types attributed to subphase BM1A, with typo-chronological attributions from recent micro-regional syntheses.
- Figure 9.2b: interpretation of the emergent “Grotta Nuova” sphere at the Early-Middle Bronze Age transition in the ‘time-transgressive’ scenario of overlap between ‘late’ EBA2 and ‘early’ MBA1 ceramics.
- Figure 9.3a: ‘typo-network’ based on vessel and handle types, generically attributed to subphases BM1-2, in relation to cultural groups reconstructed in the northern part of the “Protoappenninico” sphere (Southern Italy).
- Figure 9.3b: interpretation of the northern “Protoappenninico” sphere, with reference to elements discussed in the context of the emergence of the “Grotta Nuova” sphere.
- Figure 9.4: ‘typo-network’ in Abruzzo and Lazio based on vessel and handle types attributed to subphase BM1 (“Protoappenninico”).

List of tables

- Table 1.1: Bronze Age chronology in Central Italy (and abbreviations used).
- Table 3.1: overview of site numbers for each of the five Central Italian regions in Cocchi Genick's synthesis (1998), following her classification of sites in terms of types of place.
- Table 3.2: abbreviations and terminology based on ceramics typochronology.
- Table 3.3: overview of site numbers in terms of the relative chronology based on EBA ceramics in Central Italy.
- Table 3.4: overview of the numbers of vessel types, handles and decorations in terms of EBA typochronology.
- Table 3.5: overview of the numbers of caves and open-air sites in terms of relative chronology based on EBA ceramics in Central Italy.
- Table 3.6: overview of radiocarbon dates in the range 4000-3600 BP from archaeological contexts in Abruzzo and Lazio.
- Table 3.7: overview of radiocarbon dates in the range 3600-3300 BP from archaeological contexts in Abruzzo and Lazio.
- Table 3.8: overview of 'dry event' and/or deforestation signatures from lake basins in Abruzzo and Lazio.
- Table 3.9: overview of absolute dates from geological and archaeological contexts related to the Avellino eruption of SOMMA-VESUVIUS (Campania).
- Table 4.1: overview of the composition of EBA hoards in Central Italy in terms of classes of metalwork.
- Table 4.2: overview of the periodisation of EBA hoards in Central Italy.
- Table 4.3: synchronisation of EBA typochronologies of ceramics and metalwork based on their spatial distributions and extent.
- Table 4.4: overview of composition analyses available for 'horizon I' and 'horizon II' axe hoards from Central Italy.
- Table 4.5: overview of composition analyses available for axes in the three 'horizon II' and 'horizon II-III' axe hoards from CAMPIGLIA D'ORCIA (Siena, Tuscany).
- Table 4.6: overview of composition analyses available for ingots in 'horizon II' and 'horizon II-III' axe hoards from CAMPIGLIA D'ORCIA (Siena, Tuscany).
- Table 4.7: overview of composition analyses available for 'horizon III' axe hoards.
- Table 4.8: overview of composition analyses available for 'horizon III-IV' and/or 'horizon IV' axe hoards.
- Table 4.9: overview of regional differentiation in the spatial distribution of metal-hilted daggers from Italy.
- Table 4.10: overview of composition analyses available for blades of metal-hilted daggers ("Vollgriffdolche") from Central Italy.
- Table 4.11: three scenarios for the interpretation of hoards of metalwork.
- Table 4.12: overview of (late) Copper Age-EBA metalwork deposition in coastal Abruzzo.
- Table 4.13: overview of (late) Copper Age-EBA metalwork deposition in the intermontane region.
- Table 4.14: overview of (late) Copper Age-EBA metalwork deposition in northern Lazio.
- Table 4.15: overview of (late) Copper Age-EBA metalwork deposition in southern Lazio.
- Table 4.16: overview of composition analyses available for copper axes from Abruzzo and Lazio, dated to the Copper Age and 'horizon II'.
- Table 4.17: overview of composition analyses available for copper daggers and halberds from Abruzzo and Lazio.
- Table 4.18: overview of composition analyses available for copper awls and needles from Lazio.
- Table 4.19: overview of composition analyses available for EBA bronze axes from Abruzzo and Lazio, dated to 'horizon II' and 'horizon III'.
- Table 4.20: overview of composition analyses available for EBA bronze daggers from Abruzzo and Lazio.
- Table 4.21: distribution of the size and number of rivets of metal-hilted daggers from Abruzzo and Lazio.
- Table 4.22: size distribution of Copper Age-EBA 'simple' daggers and halberds from Abruzzo and Lazio.
- Table 4.23: size distribution of Copper Age-EBA axes from Abruzzo and Lazio.
- Table 4.24: size distribution and depositional contexts of metal-hilted daggers from Central Italy.

- Table 4.25: size distribution and depositional contexts of metal-hilted daggers from Southern Italy, including cross-Adriatic finds.
- Table 5.1: overview of (late) Copper Age-EBA funerary contexts in coastal Abruzzo.
- Table 5.2: overview of (late) Copper Age-EBA funerary contexts in the intermontane region.
- Table 5.3: overview of (late) Copper Age-EBA funerary contexts in northern Lazio.
- Table 5.4: overview of (late) Copper Age-EBA funerary contexts in southern Lazio.
- Table 5.5: summary of Copper Age funerary contexts in Abruzzo and Lazio.
- Table 5.6: age distribution of articulated burials in Copper Age rock-cut tombs in Central Italy.
- Table 5.7: age and sex/gender distributions of buried individuals from EBA funerary contexts in Abruzzo and Lazio.
- Table 5.8: sex/gender distributions of articulated burials in Copper Age rock-cut tombs in Central Italy.
- Table 5.9: evidence for selective, secondary treatment of human remains from EBA funerary contexts in Abruzzo and Lazio.
- Table 5.10: a comparison of Copper Age and EBA funerary contexts from Abruzzo and Lazio in terms of primary and secondary burial.
- Table 5.11: a comparison of Copper Age and EBA funerary contexts from Abruzzo and Lazio in terms of funerary sequences and notions of ancestorhood.
- Table 6.1: overview of later prehistoric (Neolithic-EBA) trajectories of cave use in coastal Abruzzo.
- Table 6.2: overview of later prehistoric (Neolithic-EBA) trajectories of cave use in the intermontane region.
- Table 6.3: overview of later prehistoric (Neolithic-EBA) trajectories of cave use in northern Lazio.
- Table 6.4: overview of later prehistoric (Neolithic-EBA) trajectories of cave use in southern Lazio.
- Table 6.5: polythetic classification of EBA cave assemblages in Abruzzo and Lazio.
- Table 6.6: connotations and character of EBA cave use in Abruzzo and Lazio.
- Table 7.1: overview of (late) Copper Age-EBA open-air sites in ‘coastal’ Abruzzo.
- Table 7.2: overview of (late) Copper Age-EBA open-air sites in the intermontane region.
- Table 7.3: postulated trajectories of community formation in intermontane Abruzzo.
- Table 7.4: overview of (late) Copper Age-EBA open-air sites in northernmost Lazio.
- Table 7.5: overview of (late) Copper Age-EBA open-air sites in ‘southern’ northern Lazio.
- Table 7.6: overview of (late) Copper Age-EBA open-air sites in southern Lazio.
- Table 7.7: polythetic classification of (late) Copper Age-EBA1 open-air assemblages from Abruzzo and Lazio.
- Table 7.8: polythetic classification of generically EBA open-air assemblages from Abruzzo and Lazio.
- Table 7.9: polythetic classification of EBA2 open-air assemblages in Abruzzo and Lazio.
- Table 7.10: overview of structural remains and features in (late) Copper Age-EBA2 open-air assemblages from Abruzzo and Lazio.
- Table 7.11: overview of the proportions of domestic species in faunal samples from (late) Copper Age-EBA1 cave and open-air assemblages in ‘coastal’ Abruzzo and the intermontane region.
- Table 7.12: overview of the proportions of domestic species in faunal samples from (late) Copper Age-EBA1 cave and open-air assemblages in ‘coastal’ Lazio.
- Table 7.13: overview of the proportions of domestic species in faunal samples from EBA2 assemblages in Abruzzo and Lazio.
- Table 7.14: evidence for patterns of regional differentiation in the proportions of the main domestic species in Copper Age-EBA1 and EBA2 faunal samples from Abruzzo and Lazio.
- Table 7.15: overview of the proportion and range of wild species in faunal samples from Copper Age-EBA1 assemblages in Abruzzo and Lazio.
- Table 7.16: overview of the proportion and range of wild species in faunal samples from EBA2 assemblages in Abruzzo and Lazio.
- Table 7.17: evidence for contextual differentiation in the connotations of hunting based on patterns in faunal samples and the presence or absence of arrowheads in Copper Age-EBA1 and EBA2 assemblages from Abruzzo and Lazio.
- Table 7.18: overview of the range of species in botanical samples from (late) Copper Age-EBA1 assemblages in Abruzzo and Lazio.
- Table 7.19: overview of the range of species in botanical samples from (potentially) EBA2 assemblages in Abruzzo and Lazio [including NOLA for comparison].
- Table 8.1: a general overview of archaeological visibility of the constituent elements of Copper Age-EBA cultural landscapes in Abruzzo and Lazio.

CONTENTS

- Table 8.2: overview of the spatial connotations of constituent elements of cultural landscapes as a proxy for social spheres in EBA1.
- Table 8.3: overview of the spatial connotations of constituent elements of cultural landscapes as a proxy for social spheres in EBA2.
- Table 8.4: a comparison of classes of objects and substances selected for deposition with the cosmological connotations of their respective depositional contexts.
- Table 9.1: a generalised overview of the relative archaeological visibility of constituent elements of Copper Age, Early and Middle Bronze Age cultural landscapes in Abruzzo and Lazio.
- Table 9.2: overview of time-transgressive issues and scenarios ‘at’ the Early-Middle Bronze Age transition in Central Italy.
- Table 9.3: overview of the classes and types of objects implicated in the time-transgressive scenario of regional differentiation ‘at’ the Early-Middle Bronze Age transition in Central Italy.
- Table 9.4.: overview of the trajectories of cave use (intersecting with burial), lake-side cult places and a rock-cut tomb in Lazio at the Early-Middle Bronze Age transition in the emergent “Grotta Nuova” sphere.
- Table 9.5: overview of the trajectories of cave use (including burial) and a lake-side cult place in Abruzzo and Lazio in the emergent “Protoappenninico” sphere at the Early-Middle Bronze Age transition.
