**Biophysical feedbacks between seagrasses
and hydrodynamics in relation to grazing,
water quality and spatial heterogeneity:
consequences for sediment stability
and seston trapping**

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden
op gezag van de Rector Magnificus prof. mr. C.J.J.M. Stolker
volgens besluit van het College voor Promoties
te verdedigen op woensdag 7 december 2016
klokke 10.00 uur

door

ACHMAD ADHITYA

Geboren te Tanjung Karang Bandar Lampung, Indonesië
in 1979

Promotie commissie

Promotores: Prof.dr. G.R. de Snoo (Universiteit Leiden)
Prof.dr. P. Herman (Universiteit Nijmegen)

Overige leden: Prof.dr. A. Tukker (Universiteit Leiden)
Prof.dr. P. van Bodegom (Universiteit Leiden)
Prof.dr. J. van Middelburg (Universiteit Utrecht)
Prof.dr. P. Hoekstra (Universiteit Utrecht)
Dr. T. van der Heide (Universiteit Nijmegen)

Contents

1	Introduction	7
1.1	What is seagrass?	8
1.2	Seagrass ecosystem services and functions	9
1.3	Global seagrass current condition	10
1.4	Seagrass interactions	11
1.4.1	Interaction with herbivores	11
1.4.2	Interaction with hydrodynamic	12
1.4.3	Interaction with nutrient	13
1.5	Gap dynamics	14
1.6	Outline of this thesis	15
	References	19
2	Comparison of the influence of patch scale and meadow scale characteristics on flow within seagrass meadows: a flume study	25
	Abstract	25
	Introduction	26
	Materials and methods	27
	Results	32
	Discussion	37
	Acknowledgements	40
	References	40
3	Influence of seagrass density and hydrodynamic forcing on advective pore-water exchange: a flume study with <i>Thalassia testudinum</i> mimics	45
	Abstract	45
	Introduction	46
	Materials and methods	47
	Results	50
	Discussion	55
	References	58

4	The exchange of dissolved nutrients between open water and substrate pore-water due to hydrodynamic adjustment at seagrass meadow edges: A flume study	63
	Acknowledgements	63
	Abstract	64
	Introduction	64
	Material and methods	66
	Results	69
	Discussion	74
	References	76
5	Hydrodynamic consequences of gaps in seagrass meadows: dependence on gap size, meadow density, shoot length and water depth	83
	Abstract	83
	Introduction	84
	Methods	86
	Discussion	90
	References	92
6	Synthesis	95
6.1	General Background	95
6.2	What Are the Effects of Fragmentation On Seagrass?	96
6.2.1	Fragmented Seagrass-Hydrodynamic Interaction	96
6.2.2	Fragmented Seagrass-Porewater Exchange Interaction	98
6.3	Battle of The Millennium: Seagrass vs Carbondioxide	99
6.4	Conclusion	100
6.5	Recommendations	102
	References	102
	Summary	107
	Samenvatting	109
	Curriculum vitae	111
	Acknowledgments	113
