PROMOTIECOMMISSIE

Promotores

Prof. dr. M.A. van Buchem

Prof. dr. M.D. Ferrari

Co-promotores

Dr. J. van der Grond

Dr. S.A.J. Lesnik Oberstein

Overige commissieleden

Prof. dr. F. Barkhof

(VU Medisch Centrum, Amsterdam)

Prof. dr. A.G. Webb

Prof. dr. M.H. Breuning

Prof. dr. H.A.M. Middelkoop

Dr. J. Haan

(Rijnland Ziekenhuis, Leiderdorp)

The research described in this thesis was carried out at the department of Radiology (head: Prof. dr. J.L. Bloem) of the Leiden University Medical Center.

Financial support by the Dutch Heart Foundation and Alzheimer Nederland for the publication of this thesis is gratefully acknowledged.

Financial support for this thesis was generously provided by: J.E. Jurriaanse stichting, Chipsoft B.V., Philips Healthcare, Stichting IMAGO, Guerbet Nederland, Sectra Medical Systems, Menarini Farma, Toshiba Medical Systems, Nederlandse Hoofdpijn Vereniging.

Contents

1. General introduction	9
A. Studies on CADASIL disease progression and its determinants	
2. CADASIL: progression of MR abnormalities in prospective 7-year follow-up study. <i>Radiology. 2008 Dec;249(3):964-71.</i>	21
3. Lacunar infarcts are the main correlate with cognitive dysfunction in CADASIL. <i>Stroke. 2007 Mar;38(3):923-8.</i>	37
4. MRI correlates of cognitive decline in CADASIL: a 7-year follow-up study. <i>Neurology. 2009 Jan 13;72(2):143-8.</i>	49
5. Cerebrovascular reactivity is a main determinant of white matter hyperintensity progression in CADASIL. <i>AJNR Am J Neuroradiol. 2009 Jun;30(6):1244-7.</i>	63
6. Homozygosity for a NOTCH3 mutation in a 65-year-old CADASIL patient with mild symptoms : A family report. <i>J Neurol. 2008 Dec;255(12):1978-80.</i>	75
B. High field MRI in CADASIL	
7. Lenticulostriate arterial lumina are normal in CADASIL. A high-field in-vivo MRI study. <i>Stroke 2010, Dec;41(12):2812-6.</i>	89
8. 7T MRI reveals diffuse iron deposition in the putamen and caudate nucleus in CADASIL <i>Submitted</i>	103
9. Summary and conclusions	117
Samenvatting en conclusie	123
