Table of contents

Chapter 1	11
General Introduction and outline of the thesis	
Chapter 2	33
Labour and neonatal outcome in small for gestational age babies delivered beyond 36+0 weeks: a retrospective cohort study.	
Chapter 3	45
Disproportionate Intrauterine Growth Intervention Trial At Term: DIGITAT-the protocol.	
Chapter 4	59
Induction versus expectant monitoring for intrauterine growth restriction at term: randomised equivalence trial (DIGITAT)	
Chapter 5	79
Neonatal morbidity after induction versus expectant monitoring in intrauterine growth restriction at term: a subanalysis of the DIGITAT RCT	
Chapter 6	95
Comparison of participants and non-participants in a trial of induction versus expectant monitoring for intrauterine growth restriction at term (the DIGITAT trial)	
Chapter 7	109
Maternal health-related quality of life after induction of labor or expectant monitoring in pregnancy complicated by intrauterine growth retardation beyond 36 weeks.	

Chapter 8	127
Economic analysis comparing induction of labour and expectant management for intrauterine growth restriction at term (DIGITAT trial)	
Chapter 9	141
Effects on (neuro)developmental and behavioural outcome at 2 years of age of induced labour compared with expectant management in intrauterine growth restricted infants - long term outcomes of the DIGITAT-trial.	
Chapter 10	157
Comparison of induction of labour and expectant monitoring in intrauterine growth restriction at term through integration of trial outcomes and patient preferences	
Chapter 11	171
Suspected versus non-suspected small-for-gestational age fetuses at term: perinatal outcomes.	
Chapter 12	191
General Discussion and future perspectives	
Chapter 13	205
Summary	
Chapter 14	221
Nederlandse samenvatting	
Appendices	236
Authors and collaborators on the DIGITAT-trial	237
Acknowledgements (Dankwoord)	238
Publications	242
Curriculum Vitae	245
