DISEASES OF THE NERVOUS SYSTEM ASSOCIATED WITH CALCIUM CHANNELOPATHIES

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus Prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 2 juni 2010
klokke 16:15 uur

door

BOYAN BOGDANOV TODOROV

geboren te Sofia (Bulgarije)

in 1979

PROMOTIECOMMISSIE

Promotores: Prof. dr. R. R. Frants
Prof. dr. C.I. de Zeeuw^{1,2}

Co-promotor: Dr. A.M.J.M. van den Maagdenberg

Overige leden: Prof. dr. M.D. Ferrari
Dr. F.E. Hoebeek²
Prof. dr. J.H. Meijer
Prof. dr. G. Smit³

²Erasmus MC, Rotterdam

³Vrije Universiteit, Amsterdam

The majority of studies presented in this thesis were performed at the Center for Human and Clinical Genetics of the Leiden University Medical Center (LUMC), Leiden, and the Department of Neuroscience of the Erasmus Medical Center (EMC), Rotterdam, The Netherlands. This work was supported by grants from the Netherlands Organisation for Scientific Research (NWO) (912-02-085, VICI 918.56.602), the EU Research Network (grant HPRN-CT-2000-00082), and the EU sixth framework programme “EUROHEAD” (grant LSHM-CT-2004-504837), and by the Centre for Medical Systems Biology (CMSB) established by the Netherlands Genomics Initiative/Netherlands Organisation for Scientific Research (NGI/NWO).

TABLE OF CONTENTS

Chapter 1	General introduction	7
Chapter 2	Redundancy of Ca _v 2.1 channel accessory subunits in transmitter release at the mouse neuromuscular junction <i>Brain Res. 2007;1143:92-101</i>	31
Chapter 3	Conditional inactivation of the <i>cacna1a</i> gene in transgenic mice <i>Genesis. 2006;44:589-94</i>	49
Chapter 4	Ablation of Ca _v 2.1 channels in cerebellar granule cells affects Purkinje cell firing regularity without causing motor discoordination <i>In preparation</i>	59
Chapter 5	Purkinje cell-specific ablation of Ca _v 2.1 channels is sufficient to cause cerebellar ataxia in mice <i>Submitted</i>	79
Chapter 6	Generation and characterization of transgenic mice expressing T666M mutant Ca _v 2.1- α_1 subunits in Purkinje cells <i>In preparation</i>	91
Chapter 7	High cortical spreading depression susceptibility and migraine-associated symptoms in Ca _v 2.1 S218L mice <i>Ann Neurol. 2010;67:85-98</i>	105
Chapter 8	Enhanced granule cell output and irregular Purkinje cell firing in gain-of-function <i>Cacna1a</i> ^{S218L} mutation <i>Submitted</i>	131
Chapter 9	General discussion	159
Addendum	Summary	179
	Samenvatting	183
	List of publications	188
	Curriculum vitae	189
