Cellular Signaling in Human Cholesteatoma

PROEFSCHRIFT

ter verkrijging van de graad van Doctor
aan de Universiteit te Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 24 januari 2007
te klokke 13.45 uur

door

Margaretha Aleida Huisman
Geboren te Deventer in 1953

Promotiecommissie

Promotor: Prof. Dr. J.J. Grote

Co-promotor: Dr. E. de Heer

Referent: Prof. Dr. C.J. Cornelisse

Overige leden: Prof. Dr. Ir. J.H.M. Frijns
Prof. Dr. P.S. Hiemstra

This study was performed at the department of
Otorhinolaryngology, Leiden University Medical Center, The
Netherlands

ISBN: 90-9021479-8
Design cover: OKTOBER visuele communicatie
Print: Gildeprint Drukkerijen B.V.

*Voor mijn ouders
Voor mijn kinderen*

Contents

Chapter 1:	General Introduction	p.7-20
Chapter 2:	Molecular pathways in human cholesteatoma	p.21-38
Chapter 3:	Cholesteatoma epithelium is characterized by increased expression of Ki-67, p53 and p21, with minimal apoptosis.	p.39-48
Chapter 4:	Terminal differentiation and mitogen-activated protein kinase signalling in human cholesteatoma epithelium.	p.49-58
Chapter 5:	Sustained extracellular signal-regulated kinase 1/2 mitogen-activated protein kinase signaling is related to increased p21 expression in cholesteatoma epithelium.	p.59-68
Chapter 6:	Survival signalling and terminal differentiation in cholesteatoma epithelium	p.69-78
Chapter7:	Human cholesteatoma behaves as a chronic wound: the role of transforming growth factor β	p.79-90
Chapter 8:	Summary and General Discussion	p.91-98
	Nederlandse Samenvatting	p.99-106
	Curriculum Vitae	p.107
	Publications	p.108
	Nawoord	p.109
	List of abbreviations	p.110-111
