Title: Epigenetic prognostic biomarkers in colorectal cancer

Issue Date: 2015-04-21

Epigenetic prognostic biomarkers in colorectal cancer

Anne Benard

© 2015 by Anne Benard

ISBN: 978-94-6259-563-7

The research described in this thesis was performed at the department of Surgery of the Leiden University Medical Center, Leiden, The Netherlands and at the department of Molecular Oncology at the John Wayne Cancer Institute, Santa Monica, CA, United States of America.

All rights reserved. No part of this thesis may be reproduced, stored in a retrieval system, or transmitted in any form or by any means without permission of the author, or when appropriate, the publisher holding the copyright of the articles.

Layout and cover design: Anne Benard

Printing: Ipskamp Drukkers

The printing of this thesis was financially supported by Amgen, Bayer, Boehringer Ingelheim, Chipsoft, Greiner Bio-One, Roche Nederland and Sanofi-Aventis Netherlands.

Epigenetic prognostic biomarkers in colorectal cancer

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 21 april 2015
klokke 16:15 uur

door

Anne Benard
geboren te 's-Gravenhage
in 1984

Promotiecommissie

Promotor	Prof. dr. C.J.H. van de Velde
Co-promotor	Dr. P.J.K. Kuppen
Overige leden	Prof. dr. P.J. van den Elsen <i>LUMC/VUmc</i>
	Prof. dr. A.J. Gelderblom <i>LUMC</i>
	Dr. D.S.B. Hoon <i>John Wayne Cancer Institute, CA, USA</i>
	Prof. dr. C.A.M. Marijnen <i>LUMC</i>
	Prof. dr. J.P. Medema <i>AMC</i>

Contents

Chapter 1	Introduction and thesis outline	7
Chapter 2	Epigenetic status of LINE-1 predicts clinical outcome in early-stage rectal cancer	17
Chapter 3	DNA methylation of apoptosis genes in rectal cancer predicts patient survival and tumor recurrence	37
Chapter 4	Nuclear expression of histone deacetylases and their histone modifications predicts clinical outcome in colorectal cancer	57
Chapter 5	Prognostic value of polycomb proteins EZH2, BMI1 and SUZ12 and histone modification H3K27me3 in colorectal cancer	77
Chapter 6	Histone trimethylation at H3K4, H3K9 and H4K20 correlates with patient survival and tumor recurrence in early-stage colon cancer	95
Chapter 7	Chromatin status of apoptosis genes correlates with sensitivity to chemo-, immune- and radiation therapy in colorectal cancer cell lines	111
Chapter 8	Summary	129
Chapter 9	Discussion and future perspectives	133
Appendices	Nederlandse samenvatting	141
	List of publications	148
	Curriculum Vitae	150
	Dankwoord	152
