in 1980

PROMOTIECOMMISSIE

Promotores	Prof. dr. J. Gussekloo Prof. dr. W.J.J. Assendelft
Copromotor	Dr. J.A.H. Eekhof
Overige leden	Prof. dr. R. Willemze Prof. dr. A.C.M Kroes Prof. dr. M.Y. Berger (Universitair Medisch Centrum Groningen)

The studies presented in this thesis were funded by ZonMW (The Netherlands Organization for Health Research and Development). Additional funding for HPV testing was obtained from DDL Diagnostic Laboratory (Rijswijk, the Netherlands). Financial support for the printing of this thesis was kindly provided by the SBOH (employer of GP trainees in the Netherlands) and Stichting Kleine Kwalen in de Huisartsenpraktijk.

Contents

Chapter 1	General Introduction	7
Part one: Transmission		
Chapter 2	Warts in primary school children: prevalence and relation with environmental factors	25
Chapter 3	Warts are transmitted in families and schools: a prospective cohort	35
Chapter 4	Cutaneous wart-associated HPV types: prevalence and relation with patient characteristics	49
Part two: Treatment		
Chapter 5	Natural course of cutaneous warts among primary schoolchildren: a prospective cohort	69
Chapter 6	Current choices in the treatment of cutaneous warts: a survey among Dutch general practitioners	81
Chapter 7	Cryotherapy with liquid nitrogen versus topical salicylic acid application for cutaneous warts in primary care: a randomised controlled trial	91
Chapter 8	The role of monochloroacetic acid application for common and plantar warts in primary care: a randomised controlled trial	109
Chapter 9	HPV type in plantar warts predicts natural course and treatment response: secondary analysis of a randomised controlled trial	125
Final chapters		
Chapter 10	General discussion	143
Chapter 11	Summary	157
Chapter 12	Nederlandse samenvatting	163
	Dankwoord	169
	Curriculum vitae	171
