**Title:** Tracing the evolution of protoplanetary disks

**Issue Date:** 2014-06-23

# Tracing the evolution of protoplanetary disks

Proefschrift

ter verkrijging van  
de graad van Doctor aan de Universiteit van Leiden,  
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,  
volgens besluit van het College voor Promoties  
te verdedigen op maandag 23 juni 2014  
klokke 15:00 uur

door

**Koen Maarten Maaskant**

geboren te Naarden, Nederland,  
in 1985.

## **Promotiecommissie:**

Promotoren: prof. dr. A.G.G.M. Tielens  
prof. dr. L.B.F.M. Waters  
prof. dr. C. Dominik  
Overige leden: prof. dr. C. Dullemond  
prof. dr. I. Kamp  
prof. dr. H.J.A. Röttgering  
dr. M.R. Hogerheijde

Faculteit der Natuurwetenschappen, Wiskunde en Informatica.

*Front and back cover: A selection of figures and photos are shown representing the content of this thesis. The film rolls illustrate the mission of this thesis: connecting the frames and making a story of the evolution of protoplanetary disks. Scientific figures are adapted from several papers and are referred to in the bibliography. References to the telescope photos and the artist illustrations can be found in the introduction.*

*Remember kids, the only difference between screwing around and science  
is writing it down.*

ADAM SAVAGE

# Contents

<b>1 Introduction</b>	<b>7</b>
1.1 Protoplanetary disk evolution . . . . .	7
1.2 Observations and models of protoplanetary disks . . . . .	13
1.3 Topics in this thesis . . . . .	16
1.4 Outline of this thesis . . . . .	21
1.5 Future outlook . . . . .	22
<b>2 Mid-IR imaging of the disk of HD169142: Measuring the size of the gap</b>	<b>25</b>
2.1 Introduction . . . . .	26
2.2 Observations and Data Reduction . . . . .	27
2.3 Results . . . . .	28
2.4 Modeling . . . . .	28
2.5 Discussion . . . . .	35
2.6 Conclusions . . . . .	37
<b>3 Identifying gaps in flaring Herbig Ae/Be disks using spatially resolved mid-infrared imaging: are all group I disks transitional?</b>	<b>39</b>
3.1 Introduction . . . . .	40
3.2 The sample . . . . .	41
3.3 Observations . . . . .	47
3.4 Description of the model . . . . .	49
3.5 The disk size in the Q-band . . . . .	51
3.6 The disk size in the N-band . . . . .	59
3.7 Discussion . . . . .	65
3.8 Conclusions . . . . .	71
3.9 Appendix A: photometry . . . . .	72
<b>4 Large gaps in the transitional disks of HD 100453 and HD 34282. Connecting gap sizes to spectral energy distributions</b>	<b>77</b>
4.1 Introduction . . . . .	78
4.2 The sample . . . . .	79
4.3 Observations . . . . .	80
4.4 Modeling . . . . .	82
4.5 Results . . . . .	84

4.6	Discussion . . . . .	87
4.7	Conclusions . . . . .	90
4.8	Appendix A: parameter study . . . . .	91
<b>5</b>	<b>Polycyclic aromatic hydrocarbon ionization as a tracer of gas flows through protoplanetary disk gaps</b>	<b>93</b>
5.1	Introduction . . . . .	94
5.2	New observational trends in PAH features of Herbig stars . . . . .	96
5.3	PAHs in the radiative transfer code MCMMax . . . . .	100
5.4	Benchmark model . . . . .	106
5.5	Transitional disks . . . . .	111
5.6	Discussion . . . . .	118
5.7	Conclusions . . . . .	121
<b>6</b>	<b>Location and sizes of forsterite grains in protoplanetary disks</b>	<b>123</b>
6.1	Introduction . . . . .	124
6.2	Observations . . . . .	126
6.3	Radiative transfer and dust model . . . . .	133
6.4	Benchmark modeling . . . . .	135
6.5	The strong and broad 69 micron band of HD141569 . . . . .	141
6.6	Discussion . . . . .	146
6.7	Conclusions . . . . .	149
	<b>Bibliography</b>	<b>151</b>
	<b>Curriculum vitae</b>	<b>161</b>
	<b>Nederlandse samenvatting</b>	<b>165</b>
	<b>Dankwoord</b>	<b>169</b>
