Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus Prof. Mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op dinsdag 5 november 2013

klokke 11:15 uur

door

Chenguang Wang

geboren te Beijing, China in 1980

Promotiecommissie:

Promotoren: Prof. dr. C.A.J. Knibbe
Prof. dr. M. Danhof
Prof. dr. D. Tibboel

Overige Leden: Prof. dr. P.H. van der Graaf
Prof. dr. J. Burggraaf
Prof. dr. H.J. Guchelaar
Prof. dr. R.A.A. Mathôt (Universiteit van Amsterdam)

Contents

Chapter 1	General introduction to a novel approach to characterize developmental changes in pharmacokinetics across the human lifespan: application to the prediction of clearance in children	9
Chapter 2	Scope and intent of the investigations	29
Chapter 3	The allometric exponent for scaling clearance varies with age: a study on seven propofol datasets ranging from preterm neonates to adults	35
Chapter 4	A bodyweight dependent allometric exponent for scaling clearance across the human life-span	61
Chapter 5	Developmental changes in morphine clearance across the entire paediatric age range are best described by a bodyweight-dependent exponent model	93
Chapter 6	Population pharmacokinetics of paracetamol across the human age-range from (pre)term neonates, infants, children to adults	123
Chapter 7	Scaling of clearance across the human life span from neonates to adults: conclusions and perspectives	153
Chapter 8	Schaling van de klaring van geneesmiddelen over de levensduur van een mens van pasgeborenen tot volwassenen: conclusies en perspectieven	171
Appendix I	Body weight-dependent pharmacokinetics of busulfan in pediatric hematopoietic stem cell transplantation patients: towards individualized dosing	181
Appendix II	A novel maturation function for clearance of the CYP3A substrate midazolam from preterm neonates to adults	209
