Title: Novel approach to characterize developmental changes in pharmacokinetics across the human lifespan : application to the prediction of clearance in children

Issue Date: 2013-11-05

Acknowledgements

Being a modeler, I try to model everything in my life. I think my Ph.D. life can be abstracted to a model as well. It starts from my full passions, efforts and concentrations on my research topic. As time elapses, it distributes to something else, e.g. R programming, dating, reading jokes, doing sports and meeting friends. Some may come back, but some may not. As scientific results seldomly come out directly, there is a delay between the efforts and outcomes. Probably, my Ph.D. was like a multiple compartment, combined with biotransformation, indirect effect model. Fortunately, the delay was not too long and I got results of my efforts. However, I enjoyed not only the final outcome but also the whole process, which benefited from many people's contributions.

First of all, I would like to thank my promoter Catherijne for providing all the supports, advises, guidance and corrections during my Ph.D. study. I feel very lucky to have you as my supervisor and promoter and I enjoyed the time of more than four years working with you. I would also like to thank Professor Meindert Danhof and Professor Dick Tibboel for all the guidance and encourages during my Ph.D study.

I would like to give my special acknowledgements to Professor Karel Allegaert and Dr. Mariska Y.M. Peeters not only for providing me clinical data but also for your many constructive suggestions in my research!

Professor Hu Pei: You are the mentor, who guided me onto this scientific road. You are the example that I have been trying to follow all the time. Thank you for your endless supports and great help! Professor Jiang Ji: You made me rethink my work and my life. Thank you for giving me all the opportunities to see different lives.

My colleagues in the Pharmacology Department, Elke, Imke, Ibrahim, Roosmarjin, Vincent, Amit, Vincenzo, Rick, Anne, Massimo, Tarj, Chiara, Donato, Franceseco, Massoud, Flora, Stephan, Li, Sven, Margot, Margreke, Linda, Stina, Charlotte, Joost, Jasper, Chantal, Dirk-Jan, Ashley, Oscar, Rob, Bert, Liesbeth. I had a great time working, eating, drinking, talking and having funs with you. I am very glad that I had you in one of the best periods of my life.

During my living in Leiden for 5 years, I had known lots of friends. Wang Di (王笛), Tian Jun (田俊), Guan Zheng (管崢), Chen Ao (陈傲), Wang Wei (王威), Chen Xiao (陈霞), Tu Shengxian (涂圣贤), Huang Yigen (黄一根), Gong Yiwei (宫艺威), Guo Dong (郭栋), Zhou Zhao (周照), Hans, Jochem, Rahmat, Ion, Roben, Kim, Pleuni, Tom. Thank all of you for lightening up my life!

Jun: Thank you for being with me during the last 3 years!

军，感谢你陪伴我渡过了充满爱的博士生活！

Dad: When I was a kid, none of my dreams was becoming a doctor and doing science. Surprisingly, I somehow got on this academic road and ended with this book and a Ph.D. degree. Perhaps, it was determined many years back by the subtle influences from you. Thank you for all your loves!

爸爸，在我小时候的诸多梦想中，从未有一条是当博士。机缘巧合也罢，命中注定也好，我竟然读到了这个顶头。这也许只能用耳濡目染和潜移默化来解释了。谢谢您给我的所有爱！

Mom: Thank you for all the things you have done for me!

妈妈，您辛苦了！

NaiNai: I miss you every day!

奶奶，我每一天都在想您！

Curriculum Vitae

Chenguang Wang was born on 17 August 1980 in Beijing. In 1998, he graduated from Beijing 101 middle school and started his study in the Department of Mathematics in Beijing University of Technology. He got his Bachelor of Applied Science degree in 2002 and Bachelor of Business Administration degree in 2004. In 2005, he joined the Clinical Pharmacology Research Center in Peking Union Medical College Hospital as a biostatistician. In 2008, he began his Ph.D. study in the Division of Pharmacology of the Leiden Academic Centre for Drug Research at Leiden University in the Netherlands under the supervision of Prof. Catherijne Knibbe, Prof. Meindert Danhof and Prof. Dick Tibboel focusing on PK/PD modeling in paediatric population. In the spring of 2013, he joined in the Clinical Pharmacometrics group in Bayer HealthCare in Wuppertal, Germany.
