The research described in this thesis was performed at the department of Rheumatology of the Leiden University Medical Center, Leiden, The Netherlands.

The work described in this thesis was funded by the Dutch Arthritis Foundation, whom we thank for their support. Additional financial support was obtained from the Dutch Organization for Scientific Research (Vici grant), the Research Foundation Sole Mio, the Leiden Research Foundation (STROL), the Centre for Medical Systems Biology (CMSB) within the framework of the Netherlands Genomics Initiative (NGI), the IMI JU funded project BeTheCure, contract no 115142-2, and European Union (Seventh Framework Programme integrated project Masterswitch; grant Number: 223404).

Printing of this thesis was financially supported by the Leiden University Medical Center, Leiden University, and BD Biosciences.

IMMUNE REGULATION BY MAST CELLS

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 22 maart 2016
klokke 16:15 uur

door

CONTENTS

Chapter 1	Introduction	7
Part I	Combined innate and Fc receptor triggering of mast cells and basophils	
Chapter 2	Activation of human basophils by combined toll-like receptor- and FcεRI triggering can promote Th2 skewing of naïve Thelper cells	37
Chapter 3	IgE and IL-33-mediated triggering of human basophils inhibits TLR4-induced monocyte activation	59
Chapter 4	Differential TLR-induced cytokine production by human mast cells is amplified by FcεRI triggering	81
Chapter 5	Toll-like receptor triggering augments activation of human mast cells by anti-citrullinated protein antibodies	95
Chapter 6	Ability of IL-33- and immune complex-triggered activation of human mast cells to down-regulate monocyte-mediated immune responses	115
Part II	Interactions between mast cells and CD4+ T cells	
Chapter 7	Communication between human mast cells and CD4+ T cells through antigen-dependent interactions	139
Chapter 8	Human mast cells co-stimulate T cells through a CD28-independent interaction	157
Chapter 9	Th17 expansion by human mast cells is driven by inflammasome-independent IL-1β	175
Part III	Antibody-mediated chronic inflammation in allergy and autoimmunity	
Chapter 10	Repeated FcεRI triggering reveals modified mast cell function related to chronic allergic responses in tissue	197
Chapter 11	Mast cells in rheumatic disease	233

Chapter 12	Autoantibodies in systemic autoimmune diseases: Specificity and pathogenicity	257
Chapter 13	Therapeutics to block autoantibody initiation and propagation in systemic lupus erythematosus and rheumatoid arthritis	277
Chapter 14	Summary and discussion	291
Chapter 15	Nederlandse samenvatting	323
Addendum		
	List of publications	333
	Curriculum vitae	335
	Dankwoord	337
