The function of Mitogen Activated Protein Kinases in zebrafish development

Gabby Krens

The function of Mitogen Activated Protein Kinases in zebrafish development

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 19 september 2007
klokke 15.00 uur

door

Simon Frederik Gabriel Krens

Geboren te Roosendaal en Nispen,
in 1977

Promotiecommissie

Prof. dr. H.P. Spaink • *promotor*

Prof. dr. T. Schmidt • *promotor*

Dr. B.E. Snaar-Jagalska • *copromotor*

Dr. C.P. Heisenberg • *referent*

Prof. dr. P.J.J. Hooykaas

Prof. dr. B. van de Water

Prof. dr. P.C.W. Hogendoorn

Contents

I	Functions of the MAPK family in vertebrate development	7
II	Specific activation of ERK pathway by chitin oligosaccharides in embryonic zebrafish cell lines	27
III	Characterization and expression patterns of the MAPK family in zebrafish	45
IV	Distinct functions for ERK1 and ERK2 in cell migration processes during zebrafish gastrulation	63
V	ERK1 and ERK2 MAPK are key regulators of distinct target gene signature sets in zebrafish embryogenesis	91
VI	Summary and general discussion	125
•	Nederlandse samenvatting	133
•	Curriculum vitae	139
•	Publications	141
