Author: Zhang, Xiaofei

Title: Molecular mechanisms of novel regulators in cytokine signal transduction

Issue Date: 2013-04-10

Molecular mechanisms of novel regulators in cytokine signal transduction

Xiaofei Zhang (张小飞)

Molecular mechanisms of novel regulators in cytokine signal transduction

Thesis,

Leiden University Medical Center, The Netherlands

Xiaofei Zhang (张小飞)

Molecular mechanisms of novel regulators in cytokine signal transduction

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 10 april 2013
klokke 13.45 uur

door

Xiaofei Zhang
geboren te Tangchi, Anhui, People's Republic of China
in 1983

Promotiecommissie

Promotor:	Prof. dr. P. ten Dijke
Co-promotor:	Dr. H. van Dam
Overige leden:	Prof. dr. C. H. Heldin ¹
	Prof. dr. B. van de Water
	Prof. dr. L.H.F. Mullenders

¹Ludwig Institute for Cancer Research, Uppsala University, Sweden.

The research described in this thesis was performed at the department of Molecular Cell Biology, Leiden University Medical Center, The Netherlands. This research was supported by Netherlands Research Council, Cancer Genomics Centre Netherlands and Centre of Biomedical Genetics.

Printing of this thesis was financially supported by the Stem Cell and Cancer Biology Group, Chinese Academy of Sciences Key Laboratory of Regenerative Biology, South China Institute for Stem Cell Biology and Regenerative Medicine, Guangzhou Institutes of Biomedicine and Health, Chinese Academy of Sciences, Guangzhou, China.

Additional financial support was granted by *tebu-bio* and the department of Molecular Cell Biology, Leiden University Medical Center.

Contents

Chapter 1 General introduction: Signal transduction induced by TGF- β /BMP, IL-1 β /LPS, and Wnt	7
Signal transduction in cell biology	8
1 Ubiquitination in TGF- β /BMP signaling	8
1.1 TGF- β /BMP signaling	8
1.2 Ubiquitination and deubiquitination	10
1.3 Regulation of TGF- β /BMP signaling by (de)ubiquitination	12
2 Ubiquitination in Interleukin-1 receptor (IL-1R)/Toll-like receptor 4 (TLR4) signaling	12
2.1 IL-1R/TLR4 signaling	12
2.2 Regulation of IL-1R/TLR4 signaling by (de)ubiquitination	13
3 Canonical Wnt signaling and bone formation	15
3.1 Canonical Wnt signaling	15
3.2 Canonical Wnt signaling in bone formation	15
4 Scope of this thesis	17
 Chapter 2 Fine-tuning BMP7 signaling in adipogenesis by UBE2O/E2-230K-mediated monoubiquitination of SMAD6	25
 Chapter 3 UBE2O negatively regulates TRAF6-mediated NF- κ B activation by inhibiting TRAF6 polyubiquitination	61
 Chapter 4 Ubiquitin-specific protease4 mitigates Toll-like/Interleukin-1 receptor signaling and regulates innate immune activation	83
 Chapter 5 LRP8 Mediates Wnt/ β -Catenin Signaling and Controls Osteoblast Differentiation	103
 Chapter 6 General discussion	129
 Summary	141
Nederlandse Samenvatting	143
Abbreviations	145
Curriculum Vitae	149
List of Publications	151
Acknowledgements	153
