Author: Vrouwe, Mischa G.

Title: DNA damage responses in mammalian cells : focus on signaling and repair

Date: 2012-11-20

DNA damage responses in mammalian cells

Focus on signaling and repair

DNA damage responses in mammalian cells: Focus on signaling and repair

Mischa G. Vrouwe

Contents

Scope and outline of the thesis

Chapter 1: Introduction

Chapter 2: Nucleotide excision repair - From DNA damage processing to human disease

Chapter 3: PARP1 promotes nucleotide excision repair through DDB2 stabilization and recruitment of ALC1

Chapter 4: UV-induced DNA lesions elicit ATR-dependent signaling in non-cycling cells through NER-dependent and NER-independent pathways

Chapter 5: Global phosphoproteome profiling reveals unanticipated networks responsive to cisplatin treatment of embryonic stem cells

Chapter 6: Increased DNA damage sensitivity of Cornelia de Lange syndrome cells: Evidence for a defect in recombinational repair

Chapter 7: perspectives

addendum
