Title: Studying dark matter haloes with weak lensing

Issue Date: 2012-06-20

The background of the slide is a deep space image showing several galaxy clusters. The clusters are composed of numerous galaxies, with some appearing as bright, dense cores. The space between the clusters is filled with a field of smaller, distant galaxies. The overall color palette is dominated by dark blues, purples, and oranges, with bright yellow and white highlights from the galaxy cores and stars.
