Title: Studying dark matter haloes with weak lensing

Issue Date: 2012-06-20

The background of the slide is a deep space image showing several galaxy clusters. The clusters are composed of numerous galaxies, some appearing as bright yellow and white points, others as blue and purple nebulae. The overall color palette is dark with vibrant highlights from the galaxies. In the bottom left corner, there is a small white logo consisting of a triangle with a vertical line extending upwards from its top vertex and a horizontal line extending to the right from its left vertex, resembling a stylized 'A' or a radio telescope antenna.
