Title: Studying dark matter haloes with weak lensing
Issue Date: 2012-06-20

Studying Dark Matter Haloes with Weak Lensing

Studying Dark Matter Haloes with Weak Lensing

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 20 juni 2012
klokke 11.15 uur

door

Malin Barbro Margareta Velander

geboren te Lund, Zweden
in 1983

Promotiecommissie

Promotor:	Prof. dr. K. H. Kuijken
Overige leden:	Prof. dr. M. Franx
	Prof. dr. A. Taylor (Edinburgh University, UK)
	Dr. H. Hoekstra
	Dr. J. Brinchmann

For my husband
and our little one

Table of Contents

1 Introduction **1**
- 1.1 Cosmology . . . 1
  - 1.1.1 The concordance model of cosmology . . . 1
  - 1.1.2 Alternative models . . . 6
  - 1.1.3 Cosmology probes . . . 7
- 1.2 Gravitational lensing overview . . . 11
  - 1.2.1 Fundamentals of lensing . . . 11
  - 1.2.2 Microlensing . . . 13
  - 1.2.3 Strong lensing . . . 16
- 1.3 Weak lensing . . . 19
  - 1.3.1 Convergence, shear and flexion . . . 19
  - 1.3.2 Cosmic shear . . . 23
  - 1.3.3 Galaxy-galaxy lensing . . . 25
  - 1.3.4 Bullets and train wrecks . . . 29
  - 1.3.5 Shape measurement methods . . . 32
- 1.4 This Thesis . . . 36

2 A new shape measurement method and its application to galaxies with colour gradients in weak lensing surveys **38**
- 2.1 Introduction . . . 39
- 2.2 Theoretical background . . . 40
  - 2.2.1 Shear and flexion . . . 40
  - 2.2.2 Shapelets . . . 41
  - 2.2.3 The MV pipeline . . . 43
- 2.3 Monochromatic tests . . . 45
  - 2.3.1 GREAT08 . . . 45
  - 2.3.2 FLASHES . . . 50
- 2.4 Non-monochromatic tests . . . 55
  - 2.4.1 Analytical prediction . . . 55

2.4.2 Simulations . . . 57
2.4.3 Results . . . 59
2.5 Conclusion . . . 62

3 Probing galaxy dark matter haloes in COSMOS with weak lensing flexion 64
3.1 Introduction . . . 65
3.2 Shear and flexion . . . 66
3.3 Shapelets . . . 67
3.3.1 The MV pipeline . . . 68
3.4 Testing the pipeline . . . 69
3.4.1 GREAT08 . . . 69
3.4.2 FLASHES . . . 70
3.4.3 Galaxy-galaxy simulations and bright object removal . . . 73
3.5 COSMOS analysis . . . 74
3.5.1 The COSMOS data set . . . 75
3.5.2 Data analysis . . . 75
3.5.3 Results . . . 76
3.5.4 Removing bright objects . . . 78
3.5.5 The effect of substructure . . . 78
3.5.6 Profile determination . . . 81
3.6 Discussion and conclusions . . . 83
3.A FLASHES results . . . 84
3.B COSMOS data analysis . . . 85
3.B1 Catalogue creation . . . 85
3.B2 PSF interpolation . . . 87
3.B3 CTI correction . . . 88
3.B4 Signal computation . . . 89
3.C High redshift results . . . 90
3.D Comparison with KSB . . . 90

4 The relation between galaxy dark matter haloes and baryons in the CFHTLS from weak lensing 93
4.1 Introduction . . . 94
4.2 Data . . . 95
4.2.1 Lens sample . . . 95
4.2.2 Source catalogue . . . 96
4.3 Method . . . 97
4.3.1 Weak galaxy-galaxy lensing . . . 97
4.3.2 The halo model . . . 98
4.4 Systematics tests . . . 100
4.4.1 Verification of the shear catalogue . . . 100
4.4.2 Seeing test . . . 101
4.5 Luminosity trend . . . 103
4.5.1 Photometric redshift error corrections . . . 107
4.5.2 Luminosity scaling relations . . . 109
4.5.3 Satellite fraction . . . 113
4.6 Stellar mass trend . . . 113
4.6.1 Stellar mass scaling relations . . . 115
4.7 Discussion and conclusions . . . 120

4.A Detailed luminosity bins 121
4.B Detailed stellar mass bins 124

5 Constraining cluster profiles with weak lensing shear and flexion 127
5.1 Introduction 128
5.2 Cluster lensing formalism 129
5.2.1 Shear and flexion 130
5.2.2 Contribution from the BCG 131
5.2.3 Contribution from centred cluster dark matter haloes . . 132
5.2.4 Contribution from a cluster population with miscentred BCGs 132
5.2.5 Other contributions 134
5.3 Results 135
5.3.1 Mass dependence 135
5.3.2 Concentration dependence 137
5.3.3 Offset width dependence 139
5.4 Conclusions 141
