Contents

Chapter 1	Introduction	7
Chapter 2	Assessment of allodynia relief by tissue-protective molecules in a rat model of nerve injury induced neuropathic pain	17
Chapter 3	ARA 290, a peptide derived from the tertiary structure of erythropoietin, produces long-term relief of neuropathic pain. An experimental study in rats and β -common-receptor knockout mice	29
Chapter 4	ARA 290, a peptide derived from the tertiary structure of erythropoietin, produces long-term relief of neuropathic pain coupled with suppression of the spinal microglia response	47
Chapter 5	Nonselective and NR2B-selective N-methyl-D-aspartic acid receptor antagonists produce antinociception and long-term relief of allodynia in acute and neuropathic pain	73
Chapter 6	Ketamine does not produce relief of neuropathic pain in mice lacking the β -common receptor (CD131)	97
Chapter 7	Corneal nerve density predicts the severity of symptoms in sarcoidosis patients with painful neuropathy	117
Chapter 8	ARA 290 improves symptoms in patients with sarcoidosis-associated small nerve fiber loss and increases corneal nerve fiber density	135
Chapter 9	Summary and conclusion	161
Chapter 10	Samenvatting en conclusie	169
	Curriculum Vitae	179
	List of publications	181
