Title: Drug-target residence time : a case for the adenosine A1 and A2A receptors

Issue Date: 2014-06-25

Drug-target residence time
A case for the adenosine A₁ and A_{2A} receptors

Cover description: a putative trajectory of ZM241385 binding to or unbinding from the human adenosine A_{2A} receptor. The figure is generated with ICM browser v3.7 (Molsoft) based on the first adenosine A_{2A} receptor crystal structure (PDB: 3EML).
