The Role of ApoCI, LPL and CETP in Plasma Lipoprotein Metabolism

Studies in Mice

The Role of ApoCI, LPL and CETP in Plasma Lipoprotein Metabolism

Studies in Mice

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 28 november 2006
klokke 15.00 uur

door

Cornelia Catharina van der Hoogt
geboren te Apeldoorn
in 1979

Promotiecommissie

Promotor:	Prof. Dr. L.M. Havekes
Co-promotor:	Dr. P.C.N. Rensen
Referent:	Dr. J.A. Kuivenhoven (AMC, Amsterdam)
Overige leden:	Prof. Dr. B. Staels (Inserm, Lille, Frankrijk)
	Prof. Dr. J.W. Jukema
	Prof. Dr. R.R. Frants

The studies described in this thesis were supported by a grant from the Netherlands Organization of Scientific Research (NWO/ZonMW 908-02-097). The studies were performed at the Gaubius Laboratories of TNO-Quality of Life and the Leiden University Medical Center, Leiden, The Netherlands.

The printing of this thesis was financially supported by:
The Dutch Atherosclerosis Society (DAS)
The Netherlands Organization of Scientific Research (NWO)
TNO-Quality of Life, The Gaubius Laboratory

*Gij kent mijn zitten en mijn opstaan,
Gij verstaat van verre mijn gedachten;
Gij onderzoekt mijn gaan en mijn liggen,
met al mijn wegen zijt Gij vertrouwd.
Want er is geen woord op mijn tong,
of, zie, HERE, Gij kent het volkomen;
Gij omgeeft mij van achteren en van voren
en Gij legt uw hand op mij.
Het begrijpen is mij te wonderbaar,
te verheven, ik kan er niet bij.*

Psalm 139: 2-6

Aan mijn ouders

Table of Contents

Chapter 1	General Introduction	9
Chapter 2	Severe hypertriglyceridemia in human <i>APOC1</i> transgenic mice is caused by ApoCI-induced inhibition of LPL	35
Chapter 3	Apolipoprotein CI causes hypertriglyceridemia independent of the very-low-density lipoprotein receptor and apolipoprotein CIII in mice	55
Chapter 4	The hepatic clearance of VLDL in the absence of the three major apoE-recognizing receptors is dependent on LPL	71
Chapter 5	ApoE*2-associated hyperlipidemia is ameliorated by increased levels of apoAV, but unaffected by apoCIII-deficiency	87
Chapter 6	Cholesteryl ester transfer protein decreases HDL and severely aggravates atherosclerosis in <i>APOE*3-Leiden</i> mice	99
Chapter 7	Fenofibrate increases HDL cholesterol by reducing the expression of cholesteryl ester transfer protein	115
Chapter 8	Atorvastatin increases HDL cholesterol by reducing cholesteryl ester transfer protein	135
Chapter 9	General Discussion and Future Perspectives	151
