Title: Intricacies of alpha-synuclein aggregation

Issue Date: 2016-12-14

The background of the cover is a complex network of thin, orange-yellow filaments, representing alpha-synuclein aggregates. These filaments are interconnected, forming a dense, web-like structure. The filaments vary in length and thickness, with some appearing as long, thin strands and others as shorter, thicker bundles. The overall appearance is that of a highly branched and interconnected network of protein fibers.
