The image is a high-contrast astronomical photograph of a protoplanetary disk. The background is a deep, dark blue. In the upper right, a bright, white, circular star is visible. A dark, thin arc of light curves across the top of the frame. In the lower center, a protoplanetary disk is shown, appearing as a bright, glowing ring of material surrounding a central, darker spot. The disk has a grainy, textured appearance. The text is overlaid on the upper left portion of the image.

# High-contrast imaging of protoplanetary disks
