CONTENTS

Chapter 1	General introduction and outline of this thesis	7
Part I	Evaluating treatment of older patients with breast cancer	17
Chapter 2	Variation in treatment and survival of older patients with non-metastatic breast cancer in five European countries: A population-based cohort study from the EURECCA Breast Cancer Group	19
Chapter 3	Adjuvant tamoxifen and exemestane in women with postmenopausal early breast cancer (TEAM): 10-year follow-up of a multicentre, open-label, randomised, phase 3 trial	53
Chapter 4	Physical functioning in older patients with breast cancer: a prospective cohort study in the TEAM trial	77
Part II	Prognosis of breast cancer in the presence of competing mortality	95
Chapter 5	Impact of age on breast cancer mortality and competing causes of death at 10 year follow-up in the adjuvant TEAM trial	97
Chapter 6	Impact of comorbidities and age on cause specific mortality in postmenopausal patients with breast cancer	113
Part III	From research setting to clinical practice: improving methodology in studies in older patients	131
Chapter 7	Successful ageing: a study of the literature using a citation network analysis	133
Chapter 8	Reporting absolute risks in observational studies: data from the TEAM-study on breast cancer	155
Chapter 9	Health is in the eye of the beholder: new endpoints for cancer trials in older patients	169
Chapter 10	Summary and discussion	179
Appendices:	Nederlandse samenvatting	193
	List of publications	209
	Curriculum vitae	211
	Dankwoord	213
