Advancing forensic RNA profiling

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 28 juni 2018
klokke 12:30 uur

door

Margaretha Wilhelmina van den Berge

geboren te Willemstad

in 1990

Promotor	Prof. dr. P. de Knijff
Copromotor	Dr. ir. L.M.T. Sijen - <i>Nederlands Forensisch Instituut</i>
Leden promotiecommissie	Prof. dr. M. Tijsterman Prof. dr. M. Kayser - <i>Erasmus MC University Medical Center Rotterdam</i> Dr. S.A. Harbison - <i>Institute of Environmental Science and Research Limited (ESR), Auckland, New Zealand</i>

The research described in this thesis has been performed within the Research group of the Biological Traces division at the Netherlands Forensic Institute.

This work was financially supported by the European Union Seventh Framework Programme (FP7/2007-2013) under grant agreement n° 285487 (EUROFORGEN-NoE).

Publication of this thesis was financially supported by the Netherlands Forensic Institute.

Tell me and I forget. Teach me and I remember. Involve me and I learn.

Benjamin Franklin, 1706 – 1790

Table of contents

Outline of this thesis	9
Chapter 1 A collaborative European exercise on mRNA-based body fluid/skin typing and interpretation of DNA and RNA results	15
Chapter 2 Advancing forensic RNA typing: On non-target secretions, a nasal mucosa marker, a differential co-extraction protocol and the sensitivity of DNA and RNA profiling	37
Chapter 3 Advancing forensic RNA profiling: Preventing noise signals in RNA profiling by adding the multiplex buffer last	67
Chapter 4 Prevalence of human cell material: DNA and RNA profiling of public and private objects and after activity scenarios	73
Chapter 5 DNA transfer and cell type inference to assist activity level reporting: Post-activity background samples as a control in dragging scenario	95
Chapter 6 Development of a mRNA profiling multiplex for the inference of organ tissues	103
Chapter 7 Extended specificity studies of mRNA assays used to infer human organ tissues and body fluids	125
Chapter 8 DNA and RNA profiling of excavated human organ tissues with varying postmortem intervals	143
Chapter 9 A male and female RNA marker to infer sex in forensic analysis	163
Chapter 10 General discussion	179
Chapter 11 Summary	201
Nederlandse samenvatting	205
List of publications	212
Dankwoord	214
Curriculum Vitae	215
