Whether life is worth living all depends on the liver of it  
*William James, 1842 – 1910*

## Table of contents

<b>Chapter 1:</b>	General introduction	11
<b>Part A: Risk factors</b>		<b>33</b>
<b>Chapter 2:</b>	High peak alanine aminotransferase determines extra risk for non-anastomotic biliary strictures after liver transplantation with donation after circulatory death <i>Transpl. Int. 2015;28:492-501</i>	35
<b>Chapter 3:</b>	No association of donor specific anti-HLA antibodies with non-anastomotic biliary strictures but both are independent risk factors for graft loss after liver transplantation <i>Clin Transplant 2018;32(2)</i>	57
<b>Chapter 4:</b>	Matrix metalloproteinase/ inhibitor genotypes and the development of non-anastomotic biliary strictures after orthotopic liver transplantation <i>Submitted</i>	77
<b>Part B: Diagnosis</b>		<b>97</b>
<b>Chapter 5:</b>	Value of magnetic resonance cholangiopancreatography in assessment of non-anastomotic biliary strictures after liver transplantation <i>Transplant Direct. 2015;1:e42</i>	99
<b>Chapter 6:</b>	Non-anastomotic biliary strictures with but not without cholestasis are associated with increased liver stiffness after liver transplantation <i>Submitted</i>	119
<b>Part C: Treatment and outcome</b>		<b>137</b>
<b>Chapter 7:</b>	Long-term outcome of cholangiographic treatment of biliary strictures after orthotopic liver transplantation <i>Submitted</i>	139
<b>Chapter 8:</b>	Quality of life, anxiety and depression after orthotopic liver transplantation in relation to biliary strictures and compared to healthy controls <i>Submitted</i>	161
<b>Chapter 9:</b>	Summarizing discussion	183

<b>Chapter 10:</b>	Nederlandse samenvatting	197
<b>Appendix:</b>		211
<b>Chapter 11</b>	Flushing the liver with urokinase before transplantation does not prevent non-anastomotic biliary strictures <i>Liver Transpl. 2016;22:420-426</i>	213
