Dark Ice Chemistry in Interstellar Clouds–, Thesis, Leiden University

202 pages; illustrated, with bibliographic references and summary in Dutch

ISBN/EAN: 978-94-028-2064-5

Printed by Ipskamp Drukkers

Dark Ice Chemistry in Interstellar Clouds

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van de Rector Magnificus Prof. mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 30 juni 2020
klokke 13:45 uur

door

Danna Qasim
geboren te Kuwait City, Kuwait
in 1989

Promotiecommissie

Promotores Prof. dr. H. V. J. Linnartz

Prof. dr. E. F. van Dishoeck

Co-promotor Dr. G. Fedoseev

Overige leden Prof. dr. H. J. A. Röttgering

Prof. dr. P. P. van der Werf

Prof. dr. M. K. McClure

Prof. dr. L. Hornekær

Aarhus University

Prof. dr. M. R. S. McCoustra

Heriot-Watt University

To those that have helped and continue to pave the way
to allow anyone
the opportunity to have a role in science.

Contents

1	INTRODUCTION	1
1.1	The star formation cycle	1
1.2	Translucent, dense cloud, and dark core stages	3
1.2.1	Observationally constrained ice phases	4
1.2.2	Non-energetic and energetic ice chemistry	5
1.2.3	Ice detections	6
1.2.4	Gas-phase detections	8
1.2.5	Likelihood of icy complex organic molecules (COMs)	8
1.2.6	Role of the James Webb Space Telescope for COMs	11
1.2.7	This thesis	13
2	DARK ICE CHEMISTRY	
	IN THE LABORATORY	19
2.1	Experimental Setup: SURFRESIDE ³	19
2.1.1	Analytical techniques	21
2.2	Experimental Setup: Carbon atom source testing chamber	26
2.3	Introduction	30
2.4	SURFRESIDE ³ and atomic carbon source description	32
2.4.1	Design of the C-atom line	32
2.4.2	Beam size calibration	34
2.4.3	Temperature of the graphite-filled tantalum tube	35
2.4.4	C-atom flux calibration	36
2.5	Experimental and computational results	38
2.6	Astrochemical implications	41
2.7	Conclusions	43
3	SURFACE FORMATION OF METHANE IN INTERSTELLAR CLOUDS	47
3.1	Introduction	47
3.2	Results	48
3.3	Astrochemical implications and conclusions	51
3.4	Methods	53
S1	Supporting Information	54
4	METHANOL ICE PRIOR TO HEAVY CO FREEZE-OUT	59
4.1	Introduction	59
4.2	Experimental setup and methods	62
4.3	Results and discussion	64
4.3.1	Identification and analysis of CH ₃ OH formation	64
4.3.2	Spectral signature of CH ₃ OH in a H ₂ O-rich ice	70
4.3.3	CH ₃ OH formation at 10 and 20 K	71
4.3.4	Constraining the formation of CH ₃ OH in the reaction network	72

4.4	Astrophysical implications	74
4.5	Conclusions	76
5	METHANOL ICE FORMATION	
	THRESHOLD IN DENSE CLOUDS AND DARK CORES REVISITED	81
5.1	Introduction	82
5.2	Observations and data reduction	84
5.3	Photospheric line correction and column determination	84
5.4	Results	86
	5.4.1 CH ₃ OH column density relative to A _V and H ₂ O	89
	5.4.2 Averaging spectra in A _V bins	90
5.5	Discussion	91
5.6	Conclusions and future work	92
5.7	Appendix information	93
6	EXTENSION OF THE HCOOH AND CO ₂ ICE NETWORK	103
6.1	Introduction	104
6.2	Methodology	106
	6.2.1 Experimental setup	106
	6.2.2 Experimental methods	107
6.3	Results and discussion	109
	6.3.1 Formation of HCOOH ice by H ₂ CO + H + O ₂	109
	6.3.2 Formation of CO ₂ ice by H ₂ CO + H + O ₂	113
	6.3.3 Pathways to HCOOH and CO ₂ formed in the experiments	114
6.4	Astrophysical implications	118
6.5	Conclusions	120
7	FORMATION OF INTERSTELLAR	
	PROPANAL AND 1-PROPANOL ICE	127
7.1	Introduction	127
7.2	Experimental procedure	129
	7.2.1 Description of the setup	129
	7.2.2 Overview of experiments	130
	7.2.3 Formation of propanal from C ₂ H ₂ :CO hydrogenation	131
7.3	Results	133
	7.3.1 Formation of 1-propanol from propanal	135
7.4	Discussion	137
7.5	Astrophysical implications	140
7.6	Conclusions	143
7.7	Appendix: Additional RAIR spectra	144
7.8	Appendix: xyz coordinates of transition state structures	145
7.9	Appendix: 1-propanol spectra at T _{ex} = 125 and 300 K	146
8	ALCOHOLS ON THE ROCKS: FORMED IN A H ₃ CC≡CH + OH COCKTAIL	151
8.1	Introduction	152
8.2	Methodology	154
	8.2.1 Experimental apparatus	154
	8.2.2 Experimental procedure	156

8.2.3	Computational details	156
8.3	Experimental results and discussion	158
8.3.1	Hydrogenation of $\text{HC}\equiv\text{CCH}_3$	158
8.3.2	Inclusion of OH into $\text{HC}\equiv\text{CCH}_3$ hydrogenation network . .	160
8.4	Energies and formation mechanisms	166
8.5	Astrochemical and astrobiological implications	170
8.6	Conclusions	171
s1	Additional TPD-QMS spectra	172
s2	Pathways and benchmark calculations	172
s2.1	IRC paths	172
s2.2	NEB paths	175
s2.3	M06-2X validity check	176
s2.4	CCSD(T)-F12/cc-VDZ-F12 validity check	177
