Title: Optimally weighted ensembles of surrogate models for sequential parameter optimization

Issue Date: 2020-07-02

Curriculum Vitae

Martina Marion Echtenbruck, née Friese, was born on December 2nd, 1977 in Duisburg, Germany. She obtained her general qualification for university entrance (Abitur) in 1997 at the Steinbart Gymnasium in Duisburg and immediately started the study of computer sciences at the Technical University of Dortmund where she received her diploma of computer sciences in 2008.

After the study, she worked as a software engineer (adesso AG) before she learned about the research of the academic working group on computational intelligence (spotseven) of Prof. Thomas Bartz-Beielstein at the Cologne University of Applied Sciences in 2010. She joined the group as a research scientist and tutor and started her research on ensembles of surrogate models under the supervision of Prof. Thomas Bartz-Beielstein. Moreover, since 2013 she was external Ph.D. student at Leiden Institute of Advanced Computer Science (LIACS), Faculty of Science, Leiden University under the supervision of Prof. Thomas Bäck and Dr. Michael Emmerich.
