Ecological functions and environmental fate of exopolymers of *Acidobacteria*

The research described in this thesis was performed at the Department of Microbial Ecology of the Netherlands Institute of Ecology - (NIOO-KNAW); O.Y.A. Costa was supported by an SWB grant from CNPq [202496/2015-5] (Conselho Nacional de Desenvolvimento Científico e Tecnológico, Brasil).

Cover and layout design by Ohana Yonara de Assis Costa.

Contents

Chapter 1	General Introduction and Thesis Outline.....	7
Chapter 2	Microbial extracellular polymeric substances: ecological function and impact on soil aggregation.....	19
Chapter 3	Transcriptional and proteomic responses of <i>Granulicella</i> sp. WH15 to increasing concentrations of cellobiose.....	45
Chapter 4	Impact of different trace elements on the growth and proteome of two strains of <i>Granulicella</i>	79
Chapter 5	Identification of bacterial and fungal co-occurrence networks during assimilation of acidobacterial extracellular polymers in soil.....	109
Chapter 6	Genetic potential of microbial communities involved in the degradation of a complex acidobacterial extracellular polymer.....	135
Chapter 7	General Discussion.....	169
