**Issue Date:** 2020-12-01

# Growth and Transport Properties of [Rare Earth]TiO<sub>3</sub>/SrTiO<sub>3</sub> Interfaces

Proefschrift

ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,  
volgens besluit van het College voor Promoties  
te verdedigen op dinsdag 1 december 2020  
klokke 10.00 uur

door

Nikita Lebedev  
Geboren te Kamensk-Oeralski, Rusland, 1990

Promotor:

Prof. dr. J. Aarts

Promotiecommissie:

Dr. A. Caviglia

Technische Universiteit Delft

Prof. dr. U. Zeitler

Radboud Universiteit Nijmegen

Prof. dr. E. R. Eliel

Prof. dr. ir. S. J. van der Molen

Casimir PhD series, Delft-Leiden 2020-28

ISBN 978-90-8593-454-7

An electronic version of this thesis can be found at <https://openaccess.leidenuniv.nl/>.

This work is part of the DESCO research programme of the Foundation for Fundamental Research on Matter (FOM), which is part of the Dutch Research Council (NWO).

About the cover: The cover is an abstract homage to Vasily Vereshchagin's painting, "The Apotheosis of War." The imaginary land, mountains, and sky represent the delta-doped oxide interface. The imaginary trees represent  $3d_{xz/yz}$  orbitals, whereas imaginary birds and their nests are  $3d_{xy}$  orbitals. The pile consists of graphs, images from this thesis, and colored panels. The shape of the panels is a reference to a triangular quantum well. The De Stijl-like color gamut used is a tribute to Leiden, where most of the work presented in this thesis has been done

Cover design: Nikita Lebedev

# Contents

<b>Introduction</b>	<b>1</b>
<b>1 Literature Review</b>	<b>5</b>
1.1 Introduction	6
1.2 Conducting oxide interfaces	6
1.2.1 Formation of the two-dimensional electron liquid at oxide interfaces	6
1.2.2 Superconductivity at oxide interfaces	12
1.2.3 Magnetism in oxide interfaces	13
1.2.4 Kondo-like behavior	14
1.3 The Anomalous Hall Effect in SrTiO <sub>3</sub> -based heterostructures	16
1.3.1 Mechanisms of the Anomalous Hall Effect and the Ferromagnetic Rashba Model	16
1.3.2 The Anomalous Hall Effect in SrTiO <sub>3</sub> -based heterostructures	20
1.4 Titanates (RE)TiO <sub>3</sub> , where Re=La, Eu and Gd	22
1.4.1 LaTiO <sub>3</sub>	22
1.4.2 GdTiO <sub>3</sub>	23
1.4.3 EuTiO <sub>3</sub> and Eu <sub>1-x</sub> La <sub>x</sub> TiO <sub>3</sub>	23
<b>2 Experimental Methods</b>	<b>27</b>
2.1 Introduction	28
2.2 Sample preparation	28
2.2.1 Termination of SrTiO <sub>3</sub>	28
2.2.2 Pulsed Laser Deposition	29
2.2.3 Reflection High-Energy Electron Diffraction	30
2.3 Back gating experiments in the PPMS	32
2.3.1 Insert	32
2.3.2 Van der Pauw measurements	35
2.4 Additional experimental techniques	37
