Title: Valuing archaeology? The past, present, and future for local people and archaeologists in Sudanese Nubia

Issue date: 2020-12-02

ACKNOWLEDGMENTS

This thesis exists because of generosity, supports, and kindness of many people. First and foremost, I am indebted to my supervisors; Maarten Jansen, Professor Emeritus at Leiden University offered his continuous encouragement throughout this PhD journey, and warm supports at challenging times, Neal Spencer, the director of the British Museum Amara West Research Project, gave me this wonderful opportunity to work on this topic at Amara West, inspirational advice and keeping my foot on the ground during the research; and Sada Mire provided important insights on heritage practices, colonialism and archaeology in Africa.

The fieldwork for this research was carried out as a part of the British Museum Amara West Research Project, under the auspices of the National Corporation of Antiquities and Museums (NCAM), the Republic of Sudan. I would like to especially thank the then Director-General of NCAM, Dr Abderlahman Ali Mohamed, the Head of the Field Section, el Hassan Ahmed and the wonderful inspectors, Shadia Abdo Rabo and Mohamed Saad. The Amara West Project was funded by the Qatar Sudan Archaeological Project (QSAP) in 2013-2019, alongside a range of other funders (see

https://projects.britishmuseum.org/research/research_projects/all_current_projects/sudan/amara_west_research_project/project_team_acknowledgements.aspx).

I was fortunate to work with the wonderful team of the Amara West Project. Their understanding of the importance of community engagement was always welcome encouragement for my research. The five seasons of fieldwork cannot be remembered without their company and memories of sharing lots of smiles, laughs and Nutella and surviving sandstorms and swarms of *nimitti*-flies. I would like to especially thank Anna Stevens for connecting me to the Amara West Project, her warm support and thoughtful advice throughout my PhD, and Philippa Ryan, Mat Dalton and David Fallon for valuable discussions about Nubia and archaeology. I also appreciate to the Project to make unpublished images available for my thesis.

Friends, neighbours and many people of the island of Ernetta, Abri and Amara East were so generous to spend a lot of time, share their knowledge and thoughts for my research, though I cannot name them individually here. Shereen Ahmed, Hassan Sorta, Fekri Hassan Taha volunteered to co-produce the heritage book for local children and put much passion and time into the process of the book-making.

Abdelnaser Sir Alkhatim (Republican Palace Museum) supported me with his extensive knowledge about Nubia and contributed to the Nubian podcast by translation. Mohamed Hassan Siedahmed, the director of Kerma Museum, greatly helped me in the field. Gemma Tully and Ida Dyrkorn Heierland shared their unpublished master's theses. Herman Bell enlightened me about Nubiin and connected me to the Nubian communities in UK and the Netherlands. Siddiq Fadl, Mohamed Farouq Ali and Miyuki Kerkhof helped me with translation, and Tom Grass edited the thesis. The painting on the cover is by Mosab Sorta.

Carl Graves, the director of the Egypt Exploration Society, provided me with his full support for my archive research at Lucy Gura Archive at EES, and permission to use the images from the archive. Stephanie Boostra, the Collection Manager at EES, kindly searched and scanned the images at the archive for me in the midst of the social lockdown due to the global COVID-19 pandemic. The Oriental Institute of the University of Chicago generously granted the permission to use an archival image.

The collaborative heritage book project and archive research in London were made possible by a Research Grant from the Toyota Foundation. The Department of Archaeological Heritage and Society, the Faculty of Archaeology at Leiden University also provided me with financial support for fieldwork. The grant from Leids Universiteits Fonds made possible my participation in the 14th International Conference of Nubian Studies.

I had inspirational discussions and received advice and supports from my friends and colleagues in the Department of Archaeological Heritage and Society at Leiden University, especially Uditha Jinadasa, Osiris Sinue Gonzares, Omar Aguilar Sánchez, Monique van der Dries, Genner Orstriz and Leandro Matthew Cascon. Also, the friends and comrades in this PhD journey, Uditha, Osiris, Omar, Sony, Natalia, Jana, Andy, Eldris, Mikyuki, Rocío, Raul, Juan Carlos, Adrian, Ludo, Paul, Ilona, Miriam, Melanie, Lisa, Akiko-chan, Barbara and Mayumi-san, brightened my days in Leiden. Thanks also to my long-time Arabic teacher and friend in Cairo, Shimaa Fouad.

Finally, to my parents, sister and brother. Thank you so much for all of the support in many different ways from home. Our childhood memory of the local heritage walk encouraged me to keep pursuing this research.

CURRICULUM VITAE

Tomomi Fushiya was born in Nagoya, Japan on 1 May 1981. After she obtained her high school diploma at Showa High School in Nagoya in 1999, she studied Egyptian archaeology and cultural anthropology and completed a BA at the Faculty of Letters, Arts and Science II, Waseda University (Tokyo, Japan) in 2006. During her undergraduate study, she studied as an exchange student at University of Toronto in 2003-2004 and worked as a student volunteer at the Institute of Egyptology at Waseda University for three years. She continued on her study at the Institute of Archaeology, University College London and completed a MA in Managing Archaeological Sites in 2007. Her MA dissertation proposed a community involvement strategy for site management, based on her case study from Abu Roach, Egypt.

She worked as a part of the Conservation and Management of the Valley of the Queens Project at the Getty Conservation Institute in Los Angeles in 2008-2010 and completed the study on the site biography that expanded site presentation options and contributed to the site assessment reports. She was involved in the planning and implementation of a capacity-building project at the Grand Egyptian Museum Conservation Centre through the National Research Center of Cultural Properties, Tokyo (NRICPT) as a visiting researcher, and Japan International Cooperation Agency (JICA) as the project coordinator in 2010-2012. She was a UNESCO consultant for heritage management information assessment at the Memphis and its Necropolis World Heritage site in 2012-2013. She joined the British Museum Amara West Project in 2014 and started her PhD research in 2015 at the Faculty of Archaeology, Leiden University.

She continues her work in Sudan, currently leading community engagement programmes at Old Dongola as a research associate at the Polish Centre for Mediterranean Archaeology of University of Warsaw from 2019. She also conducted a preliminary study at Tombos with University of California Santa Barbara and Purdue University in 2020.
