Genetic determinants of cholesterol and energy metabolism

Implications for cardiometabolic health

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker
volgens besluit van het College voor Promoties
te verdedigen op donderdag 20 september 2018
klokke 16.15 uur

door

Lisanne Louise Blauw

geboren te Leiderdorp
in 1993

Promotor	Prof. dr. P.C.N. Rensen
Copromotor	Dr. ir. R. de Mutsert
Leden promotiecommissie	Prof. dr. K. Willems van Dijk Prof. dr. O.M. Dekkers Dr. R. Frikke-Schmidt (<i>UCPH, Kopenhagen</i>) Prof. dr. J.A. Kuivenhoven (<i>UMCG, Groningen</i>)

The work described in this thesis was performed at the Department of Medicine, Division of Endocrinology, Leiden University Medical Center, Leiden, The Netherlands.

Lisanne Blauw was supported by a grant of the Board of Directors of the Leiden University Medical Center.

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged. The research described in this thesis was supported by a grant of the Dutch Heart Foundation (2014B002 CVON ENERGISE).

Table of content

Chapter 1	Aim and general introduction	1
PART I - CHOLESTEROL METABOLISM		
Chapter 2	Serum CETP concentration is not associated with measures of body fat: The NEO study	23
Chapter 3	Metabolic liver inflammation in obesity does not robustly decrease hepatic and circulating CETP	41
Chapter 4	CETP concentration: a genome-wide association study followed by Mendelian randomization on coronary artery disease	65
Chapter 5	Exome-wide analysis for rare variants identifies ABCA6 as determinant of circulating CETP concentration	99
Chapter 6	Circulating CETP causally decreases large HDL and increases small VLDL without affecting LDL	113
PART II - ENERGY METABOLISM		
Chapter 7	Diabetes incidence and glucose intolerance prevalence increase with higher outdoor temperature	153
Chapter 8	Smoking is associated with increased resting energy expenditure in the general population: The NEO study	175
Chapter 9	Genetic variation in the obesity gene FTO is not associated with decreased fat oxidation: The NEO study	191
Chapter 10	General discussion and future perspectives	209
Chapter 11	Addendum	229
	Summary	230
	Nederlandse samenvatting	234
	Dankwoord	239
	List of publications	241
	Curriculum vitae	243
	List of abbreviations	244
