Author: Ruchisansakun, S.

Title: Balsaminaceae in Southeast Asia: systematics, evolution, and pollination biology

**Issue Date**: 2018-09-19

#### **CURRICULUM VITAE**

Saroj Ruchisansakun was born in Bangkok, Thailand, on November 3, 1987 (B.E. 2530), and grew up in Nong Khai province. Since 2003, he has been receiving scholarships from the Institute for the Promotion of Teaching Science and Technology (IPST), Thailand. He completed his secondary education from the Mahidol Wittayanusorn School in 2006. Thereafter, he started pursuing biology at the Department of Plant Science, Mahidol University, Bangkok, and earned his Bachelor of Science degree in 2010 and Master of Science degree in 2013 from the same University. During his bachelor's degree, he was interested in the various topics regarding Zingiberaceae. He conducted research on the colchicine-induced chromosome doubling, the Agrobacterium-mediated transformation of Globba, and also the diversity of Zingiberaceae used for the festival of floral offerings in Thailand. In that period, he also participated as a research assistant in the taxonomic study, genetic diversity and conservation of plants in Sri Nagarindra-Dam plant conservation area, Kanchanaburi, a project which inspired him to work in the field of taxonomy. In his master's degree, he started working on the molecular phylogeny of Balsaminaceae in Thailand. In 2013, he moved to the Netherlands to start his PhD at the Naturalis Biodiversity Center. He continued his work on the same plant family, but on a broader scale under the supervision of Dr. Timotheüs van der Niet, Dr. Steven Janssens and Prof. dr. Erik Smets. During his PhD, his interest also included pollination biology and the evolution of the flower morphology, which is reflected in the present thesis. In 2014, he performed fieldwork for his pollination studies in Doi Chiang Dao, Thailand; during two months he observed *Impatiens* species, most of the time in forests. In 2015, he travelled for four months across Myanmar and collected samples of Balsaminaceae species. For his taxonomic work, he visited the following herbaria: AAU, BK, BKF, BR, K, L, MAND, QBG, RAF, RANG, and SING. Furthermore, he attended conferences in China, England, Scotland, and South Africa.

#### Abstracts:

**Ruchisansakun S**, Janssens SB, Smets EF, Van Der Niet T. 2017. Pollinator-driven floral evolution with and without pollinator shifts in *Impatiens* (Balsaminaceae). *The 19th Botanical Congress*, Shenzhen, China, July 2017. (oral presentation)

**Ruchisansakun** S, Suksathan P, Van der Niet T, Smets EF, Saw-Lwin, Janssens SB. 2015. Oral presentation in the topic "A revision of Balsaminaceae in Myanmar. *The 10<sup>th</sup> Flora Malesiana Meeting*, Edinburgh, Scotland, July 2016. (oral presentation)

**Ruchisansakun S**, Janssens SB, Smets EF, Van Der Niet T. 2014. Are transitions in life history strategies driven by moisture gradients in mesic environments? A case study from the *Semeiocardium* clade (*Impatiens*). *The 16th Flora of Thailand meeting*, London, England, September 2014. (Oral presentation)

**Ruchisansakun S**, Janssens SB, Van Der Niet T. 2014. *Impatiens* of Africa and SE Asia: Comparison of frequencies of pollination syndromes and evolutionary shifts between them". *The 20<sup>th</sup> Congress of AETFAT*, Stellenbosch, South Africa, January 2014 (poster presentation)

#### ACKNOWLEDGEMENTS

First, I gratefully acknowledge Timotheüs van der Niet, my daily supervisor, and my co-supervisor, Steven B. Janssens, for their guidance and continuous support. I am very grateful to my former supervisors; Thaya Jenjittikul, Piyakaset Suksathan, Pramote Triboun, Jiranan Techaprasan. Much gratitude goes to my co-authors, Pornpimon Tangtorwongsakul and Ruth J. Cozien, and some friends who assisted me in my Myanmar, Saw-Lwin, Thet Yu New, Pan Khet Khet and Myanmar Floriculturist Association, Myo Min Latt and the Tanintharyi nature reserve, the Ministry of Natural Resources and Environmental Conservation (MONREC) of the Republic of the Union of Myanmar. I also thank Kazumi Fujikawa, Yumiko Baba, and the Makino Botanic Garden expedition team. Moreover, I also would like to thank Adam Shuttleworth, Daniel C. Thomas, Peter van Welzen, Peter Hovenkamp, David Middleton, Somsak Thithichayaporn, Maarten van 't Zelfde, Karl Duffy, Wim Baert, Arne Mertens, for their help with different part of my thesis.

For the beautiful time and positive influence on my PhD life, I thank Bhanumas Chantarasuwan, Constantijn B. Mennes, Cynthia Crul, Eka Iskandar, Frederic Lens, Harro de Moor, Jesus Aguirre Gutierrez, Lalin Kovudhikulrungsri, Larissa Chacon Doria, Leon Marshall, Luis N. Morgado, Nicolas Davin, Nieke Knoben, Onanong Nuchuchua, Pimmanus Wibulsilp, Renato Gama, Renyong Yu, Roderick Bouman, Satinee Rakkhumkaeo, Sofia Gomes, Vincent Merckx, Yotsawate Sirichamorn, and all my friends both in Thailand and in the Netherlands. I would also like to thank the supporting staff of our office, especially the person in charge of taking care of the coffee machine and the cleaning lady.

I would like to thank Development and Promotion of Science and Technology talents project (DPST) Scholarship, The Institute for the Promotion of Teaching Science and Technology (IPST), Thailand, for the opportunity they have given me, and Naturalis Biodiversity Center, the Netherlands, the Alberta Mennega Foundation, the Netherlands, and the Treub-Maatschappij, the Netherlands, for their financial support for some parts of my work. We thank the curators and staff of the following herbaria for their help: AAU, BR, BK, BKF, BM, MAND, L, QBG, RAF, and RANG.

My deepest gratitude goes to my father, mother, and two beloved sisters, who have always support me in every way they can.
