Title: EEG theta/beta ratio: a marker of executive control and its relation with anxiety-linked attentional bias for threat

Issue Date: 2019-04-24

EEG Theta/Beta Ratio

A Marker of Executive Control and its Relation with
Anxiety-Linked Attentional Bias for Threat

Dana van Son

Cover by Lieke van Son

Printing by GVO drukkers & vormgevers B.V.

ISBN: 978-94-6332-477-9

This research was supported by a grant from the Netherlands Organization for Scientific Research (NWO; #452-12-003) to Dr. P. Putman. Collaboration between Leiden University and the University of Wollongong was supported by the Leiden University Fund (LUF; CWB # 7518 SV) granted to D. van Son. NWO or LUF were not involved in any part of this thesis.

CONTENT

INTRODUCTION	7
Aim and Research Questions	17
CHAPTER 1. Early and late dot probe attentional bias to mild and high threat pictures: relations with EEG theta/beta ratio, self-reported trait attentional control and trait anxiety.	25
CHAPTER 2. Acute effects of caffeine on threat selective attention: moderation by anxiety and EEG theta/beta ratio.	43
CHAPTER 3. Frontal EEG theta/beta ratio during mind wandering episodes.	71
CHAPTER 4. EEG theta/beta ratio co-varies with mind wandering versus controlled thought and functional connectivity in the executive control network.	93
CHAPTER 5. EEG Theta/Beta Ratio Neurofeedback Training in Healthy Females.	115
CHAPTER 6. GENERAL DISCUSSION	143
Dutch Summary	166
About the Author & Publications	171
Acknowledgements (Dankwoord)	173

Tien jaar geleden kon nog gesproken worden van 'natuurbehoud',
nu moet men spreken van 'milieu restauratie'.

- uit het Proefschrift van Sylvia Bruisten, 1989
