Control of Western flower thrips through jasmonate-triggered plant immunity

PhD thesis Leiden University, The Netherlands

The research described in this thesis was performed at the Institute of Biology Leiden
Leiden University, The Netherlands

The research was founded by the China Scholarship Council (CSC) of the Ministry of Education and the Technology Foundation STW, project ‘Green Defense against Pests (GAP)’.

Cover design and thesis lay-out by Gang Chen

Printing: Ridderprint BV, The Netherlands

ISBN: 978-94-6375-441-5

Control of Western flower thrips through jasmonate-triggered plant immunity

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 25 juni 2019
klokke 15:00 uur

door

Gang Chen

geboren te Bazhong, Sichuan, China

in 1989

Promotiecommissie

Promotor

Prof. Dr. Peter G. L. Klinkhamer

Copromotor

Dr. Rocío Escobar-Bravo

Overige leden

Prof. Dr. Gilles van Wezel

Prof. Dr. Johan Memelink

Prof. Dr. Caroline Müller (Bielefeld University, Germany)

Prof. Dr. Martijn Bezemer

Dr. Petra M. Bleeker (University of Amsterdam, The Netherlands)

Contents

Chapter 1	7
General introduction	
Chapter 2	25
Type VI glandular trichome density and their derived volatiles are differently induced by jasmonic acid in developing and fully developed tomato leaves: implications for Western flower thrips resistance	
Chapter 3	51
Induced resistance against Western flower thrips by <i>Pseudomonas syringae</i> -derived defense elicitors in tomato	
Chapter 4	79
Phenotypic variation in constitutive and jasmonic acid-mediated induced defenses against Western flower thrips in chrysanthemum	
Chapter 5	99
Site-dependent induction of jasmonic acid-associated chemical defenses against Western flower thrips in chrysanthemum	
Chapter 6	123
Summary and discussion	
Samenvatting en discussie	130
Curriculum vitae	135
List of publications	136
