Title: Identification of neural and non-neural contributors to joint stiffness in upper motor neuron disease

Issue Date: 2019-06-20

**Identification of neural and non-neural contributors to
joint stiffness in upper motor neuron disease**

Novel tools for diagnosis and follow-up

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden

op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker

volgens besluit van het College voor Promoties

te verdedigen op donderdag 20 juni 2019

klokke 10:00 uur

door

Karine Lamberthe de Gooijer-van de Groep

geboren te Nijkerk

in 1984

Promotor

Prof dr. J.H. Arendzen

Co-promotoren

Dr. Ir. J.H. de Groot

Dr. C.G.M. Meskers (VU Medisch Centrum)

Leden promotiecommissie

Prof. dr. T.P.M. Vliet Vlieland

Prof. dr. ir. J. Harlaar (VU Medisch Centrum, TU Delft)

Prof. dr. K. Desloovere (KU Leuven)

*To wisdom belongs the intellectual apprehension of things eternal; to knowledge,
the rational apprehension of things temporal*

St. Augustine, 354-430

Content

1. Introduction	9
2. Differentiation between non-neural and neural contributors to ankle joint stiffness in cerebral palsy	17
3. Non-invasive assessment of ankle muscle force-length characteristics post-stroke	35
4. Estimation of tissue stiffness, reflex activity, optimal muscle length and slack length in stroke patients using an electromyography driven antagonistic wrist model	65
5. Early shortening of wrist flexor muscles coincides with poor recovery after stroke	97
6. Estimating the effects of botulinum toxin A therapy post-stroke: evidence for reduction of background muscle activation	119
7. Summary and general discussion	137
8. Nederlandse samenvatting – summary in Dutch	149
