TABLE OF CONTENTS

Chapter 1	General introduction and outline of this thesis	7
Chapter 2	Association analysis of insulin-like growth factor-1 axis parameters with survival and functional status in nonagenarians of the Leiden Longevity Study <i>doi: 10.18632/aging.100841</i>	19
Chapter 3	Growth hormone secretion is diminished and tightly controlled in humans enriched for familial longevity <i>doi: 10.1111/acle.12519</i>	35
Chapter 4	Familial longevity is not associated with major differences in the hypothalamic-pituitary-gonadal axis in healthy middle-aged men <i>doi: 10.3389/fendo.2016.00143</i>	53
Chapter 5	Interrelationships between pituitary hormones as assessed from 24-h serum concentrations in healthy older subjects	73
Chapter 6	The 24-hour serum profiles of bone markers in healthy older men and women <i>doi: 10.1016/j.bone.2018.10.002</i>	97
Chapter 7	General discussion	121
Chapter 8	English summary Nederlandse samenvatting List of publications List of co-authors Curriculum Vitae Dankwoord	141
