Author: Rinaldin, M.

Title: On the geometry of demixing: A study of lipid phase separation on curved surfaces

Issue Date: 2019-11-07

ON THE GEOMETRY OF DEMIXING

A study of lipid phase separation on curved surfaces

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 7 november 2019
klokke 10 uur

door

Melissa Rinaldin

geboren te Vicenza (Italië)
in 1990

Promotores: Dr. D.J. Kraft
Prof. dr. M. L. van Hecke

Co-promotor: Dr. L. Giomi

Promotiecommissie: Dr. T. Idema (Delft University of Technology)
Dr. M. Staykova (Durham University, Durham, VK)
Prof. dr. E. R. Eliel
Prof. dr. H. Schiessel
Prof. dr. T. Schmidt

Casimir PhD series, Delft-Leiden 2019-32

ISBN 978-90-8593-415-8

An electronic version of this thesis can be found at <https://openaccess.leidenuniv.nl>

The work described in this thesis was supported by the NanoFront consortium, a program of the Netherlands Organisation for Scientific Research (NWO) that is funded by the Dutch Ministry of Education, Culture and Science (OCW) and the VENI grant 680-47-431, also financed by NWO.

The cover shows the phase separation of droplets made of oil paint in water. Seven colours were made starting from cerulean blue, cadmium yellow, and viridian. These colours are also used in this thesis to mark the beginning of each chapter.

Contents

1	Introduction	1
2	Colloid supported lipid bilayers	17
3	Lipid demixing on colloids	45
4	On the mechanics and thermodynamics of phase separation in curved space	67
5	Lipid demixing on substrates topographically patterned with colloids	101
6	Lipid bilayers of designed curvature on substrates obtained <i>via</i> micro-printing and replica-moulding	117
7	Conclusions	135
	Appendix	141
	Bibliography	149
	Samenvatting	167
	Summary	171
	Sintesi	175
	List of publications	179
	About the author	181
	Acknowledgements	183
