Dr. E.J. Hermans

**“YOU DON’T HAVE TO CONTROL YOUR THOUGHTS. YOU JUST HAVE TO
STOP LETTING THEM CONTROL YOU.”**

DAN MILLMAN

CONTENTS

1	General introduction	9
2	EEG theta/beta ratio as an electrophysiological marker for attentional control and its test-retest reliability.	21
3	Do not look away! Spontaneous frontal EEG theta/beta ratio as a marker for cognitive control over attention to mild and high threat	29
4	Early and late dot probe attentional bias to mild and high threat pictures: relations with EEG theta/beta ratio, self-reported trait attentional control and trait anxiety.	49
5	I'm going to fail! Acute cognitive performance anxiety increases threat-interference and impairs WM performance.	65
6	The role of cognitive control on the effects of acute stress on threat-interference during cognitive performance: An EEG study.	93
7	Hydrocortisone affects cognitive interference from threatening and erotic stimuli under acute stress.	115
8	General discussion	133
	References	147
	Dutch summary (Nederlandse samenvatting)	165
	Acknowledgements	171
	Curriculum Vitae	173
	Publications	175
