Resistance to PARP inhibition by DNA damage response alterations in BRCA1/2-deficient tumors

Ewa Gogola

About the cover:

The cover image shows a series of nuclei (in yellow and orange) subjected to micro-laser irradiation and stained with anti-PARP1 antibody to visualize PARP1 recruitment (in green) to damaged chromatin. Original microscopic pictures were taken by E. Gogola during her PhD research; graphic interpretation by Krzysztof Marciniak.

Cover design: Krzysztof Marciniak, Graphic Design and Visual Communication

Thesis lay-out: Gildeprint, Enschede

Printing: Gildeprint, Enschede

The printing of the thesis was financially supported by the NKI-AVL.
