Title: The role of zebrafish larvae for studying anxiety-like behaviour

Issue Date: 2019-11-21

The role of zebrafish larvae for studying anxiety-like behaviour

Yuvendran Muniandy

The role of zebrafish larvae for studying anxiety-like behaviour

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 21 November 2019
klokke 15.00 uur

door

Yuvendran Muniandy

geboren te Kuala Lumpur, Malaysia

in 20 April 1984

The work described in this thesis was supported by Human life advancement foundation, Kuala Lumpur Malaysia

HumanLife
Advancement Foundation

Promotor: Prof. dr. M.K. Richardson

Co-promotor: Assoc. Prof. dr. Y.H. Choi

Promotiecommissie:

- Prof. dr. G. van Wezel (voorzitter)
- Prof. dr. R. Verpoorte (secretaris)
- Prof. dr. C. ten Cate
- Prof. dr. Gert Flik (Nijmegen University)
- Assoc. Prof. dr. M. Schaaf
- Asst. Prof. dr. C. Tudorache
- Asst. Prof. dr. J. Legradi (VU Amsterdam)

Table of Contents

Chapter 1	General introduction and thesis outline	1
Chapter 2	The use of larval zebrafish (<i>Danio rerio</i>) model for identifying new anxiolytic drugs from herbal medicine	14
Chapter 3	Chronic treatment with serotonergic psychotropic drugs causes locomotor suppression and toxicity in 5-day zebrafish larvae	58
Chapter 4	Serotonin toxicity-like phenotypes in zebrafish larvae – chronic treatment with serotonergic psychotropic drugs fails to attenuate thigmotaxis	84
Chapter 5	Evidence for developmental toxicity in zebrafish embryos and larvae after treatment with synthetic and herbal-based psychotropic drugs	108
Chapter 6	Summary and discussion	137
	Nederlandse samenvatting	151
	Acknowledgments	159
	Curriculum vitae	161
	List of publications and Manuscripts	162
