Hreinn Benonisson
geboren Reykjavik 1986

Promotor

Prof. dr. ir. S.M. van der Maarel

Co-promotores:

Dr. J. S. Verbeek

Dr. T. van Hall

Leden promotiecommissie

Prof. Dr. P. Devilee

Prof. Dr. M.J. Jager

Prof. Dr. M. van Egmond
(Vrije Universiteit Amsterdam, Amsterdam)

Dr. D. Zaiss
(University of Edinburgh, Edinburgh)

The research described in this thesis was performed at the Department of Human Genetics, the Department of Medical Oncology and the Department of Immunohematology and Bloodtransfusion of the Leiden University Medical Center, Leiden, The Netherlands and was supported by funding from the People Programme (Marie Curie Actions) of the European Union's Seventh Framework Programme FP7/2007-2013 under Grant Agreement 317445

Table of contents

Chapter 1:	General Introduction	7
Chapter 2:	A Restricted Role for FcγR in the Regulation of Adaptive Immunity	25
Chapter 3:	FcγRI expression on macrophages is required for antibody-mediated tumor protection by cytomegalovirus-based vaccines.	45
Chapter 4:	High FcγR Expression on Intratumoral Macrophages Enhances Tumor-Targeting Antibody Therapy.	63
Chapter 5:	CD3-Bispecific Antibody Therapy Turns Solid Tumors into Inflammatory Sites but Does Not Install Protective Memory.	79
Chapter 6:	General discussion	101
Chapter 7:	Nederlandse samenvatting	119
	Summary	120
	Curriculum vitae	123
	Acknowledgements	125
	List of publications	127
