Title: A semisynthetic peptide-metalloporphyrin responsive matrix for artificial photosynthesis

Issue Date: 2019-11-20

Index

Contents

Abbreviations.....	5
---------------------------	----------

Chapter 1

A general introduction.....	7
1.1 Moving from natural photosynthesis to artificial photosynthesis	7
1.2 The natural and artificial light-harvesting antenna	9
1.3 Non-adiabatic Conversion by Adiabatic Passage (NCAP) processes	12
1.4 Constitution of an artificial light-harvesting antenna complex.....	13
1.4.1 The synthesis of tCsmA	13
1.4.2 The constitution of the tCsmA-ZnPP complex.....	15
1.5 Structure determination.....	16
1.6 Single particle analysis for helical structure	18
1.7 Scope of this thesis.....	19
1.8 References	20

Chapter 2

Self-assembly of a semi-synthetic zinc-protoporphyrin IX peptide complex derived from the natural CsmA light harvesting antenna	23
2.0 Abstract	23
2.1 Introduction.....	24
2.2 Experimental section	25
2.2.1 Materials.....	25

2.2.2 Equipments.....	26
2.2.3 Methods	26
2.3 Results and discussion.....	28
2.3.1 Constitution and characterization.....	28
2.3.2 Structural information.....	32
2.3.3 Photostability	35
2.3.4 Exciton-energy transfer	37
2.4 Conclusions.....	39
2.5 References.....	40
2.6 Appendix.....	43

Chapter 3

Contrasting modes of modulated self-assembly for CsmA homologues coordinated to ZnPP	49
3.0 Abstract	49
3.1 Introduction.....	50
3.2 Experimental section	51
3.2.1 Materials.....	51
3.2.2 Equipment	51
3.2.3 Methods	51
3.3 Results and discussion.....	52
3.3.1 Conditions for self-assembly of the tCsmA-ZnPP complex	52
3.3.2 The helical structure of the self-assembly.....	56
3.3.3 The para-crystalline structure of the self-assembly.....	57

3.4 Conclusion	62
3.5 References	63

Chapter 4

Cryo-EM structure of the self-assembly of tCsmA and ZnPP	65
4.0 Abstract	65
4.1 Introduction	66
4.2 Experimental section	67
4.3 Results and discussion	68
4.3.1 Cryo-EM images processing of the helical self-assembly	68
4.3.2 Cryo-EM structure of the helical self-assembly	71
4.4 Conclusion	73
4.5 References	75
4.6 Appendix	76

Chapter 5

Purification of recombinant variants of tCsmA	77
5.0 Abstract	77
5.1 Introduction	78
5.2 Experimental section	78
5.2.1 Materials	78
5.2.2 Methods	80
5.3 Results and discussion	83
5.3.1 Protein expression	83

5.3.2 Protein purification	85
5.4 Conclusions.....	88
5.5 References.....	90
5.6 Appendix.....	91

Chapter 6

General discussion and outlook	93
6.1 Structure assessment	93
6.2 Constitution.....	94
6.3 Photochemical relevance	95
6.4 Future experiments	96
6.4.1 Functional exploration.....	96
6.4.2 Atomic structure determination	97
6.5 References.....	99
Summary	101

Abbreviations

3DEM	3D Electron Microscopy
BCA	Bicinchoninic acid
BChl	Bacteriochlorophyll
CD	Circular dichroism
CMC	Critical micelle concentration
Cryo-EM	Cryogenic electron microscopy
CsmA	Chlorosome protein A
CTF	Contrast transfer function
DMSO	Dimethyl sulfoxide
E.coli	Escherichia coli
ET	Electron tomography
FMO	Fenna matthews olson
GuHCl	Guanidine hydrochloride
HG	Hexyl β -D-glucopyranoside
ICP-OES	Inductive coupled plasma optical emission spectrometry
IPTG	Isopropyl β -d-1-thiogalactopyranoside
KPi	Potassium phosphate
LD	Linear dichroism
MBP	Maltose-binding protein
MV	Methyl viologen
NCAP	Non-adiabatic conversion by adiabatic passage
NMR	Nuclear magnetic resonance
OG	Octyl β -D-glucopyranoside
RP-HPLC	Reverse phase high-performance liquid chromatography
SEC	Size exclusion chromatography
