Title: A semisynthetic peptide-metalloporphyrin responsive matrix for artificial photosynthesis

Issue Date: 2019-11-20

Acknowledgements

The research work presented in this thesis was sponsored by Chinese Scholarship Council (CSC) and Leiden University. They deserve the greatest acknowledgement and appreciation.

I want to give my first thank to Huub for your support, encouragement and trust. I am glad to have you as my supervisor. Every time when I found out your “secret” help, I always feel warm. I appreciate the wisdom you shared to me. I will keep them in my mind. Thanks for your kindness.

A lot of thanks to Liesbeth, I will never forget the first day we met. I followed you to finish all paperwork and living problems. I feel lucky to work with you. You are a so opened, kind and caring person. You always makes everyone’s work easier and always comforts everyone in the group. I do hope I can still knock your door and say “Can I make an appointment?” in the future. I will never forget your kindness.

I also feel lucky to have nice seniors. Thanks to Chen Song (宋辰) to teach me how to live in Leiden and take care of me like a brother. I always feel warm when you gave me some Chinese stuff to release my homesick. I also want to thank Yuliya. Thanks for your company and encouragement. I will never forget our happy memories. You are always positive and I hardly heard any complaining about work and life from you. Thanks to show me how to be a strong and positive person.

Many thanks to SSNMR group. Thanks to Anjali for giving me many suggestions on work, I admire your scientific spirit a lot. Thanks to Franco for your patience, you always explain all the questions I asked very clearly. Thanks to Wim to be the secretary for my defense, and generously offered your instruments to me. Thanks to Laura and Yang Shao (邵洋) for everything you did for me and always be “real” friends. I feel honored to work with so many friendly people here. I am also sorry that I had to spend a lot of time on work and hardly had many social talks with many of you. But when I recall all memory, I found I always got smiles and help. Agur, Alia, Fons, Brijth, Karthick, Robin, Fatemeh, Faezeh, Dieuwertje, Jessica, Remco,

Jan-Paul, Rubin, Xinmeng (李新蒙), Dario, Lijin (田利金), Vidya: I will never forget you all.

My work cannot be done without many people's support. I would like to thank Ludo, Chris and Bart from NeCEN, Arjen and Stefan from Delft University of Technology. Thank you for the help and teaching to make me a "half expert" in cryo-EM. Many thanks to Geri and Nora for the time on the protein expression and purification. I also want to acknowledge Sandrine from Vrije Universiteit Amsterdam, your passion for science will always inspire me. Thanks to Anneloes for starting working on my protein, the time following behind your fast heels will be always remembered by me. I also feel lucky to work in Leiden University, because I got a lot of help from technicians here. Jos, Hans, Viorica, Stefan: thank you for the help.

Most of my time is focus on work. But I am still lucky to make some heart friends here. Laugh, talk, support, trust and cares are all from them. Especially thank to my Chinese friend in Leiden, Kun Cao & Yanhong (曹坤&常艳红), Zhiwei & Ningning (翟志伟&许宁宁), Yao Xiao (肖遥), Han Hu(胡翰), and Jingli (辛景莉): we may separate in different places, but I am always with you all.

Many thanks to the Joostens', you show to me how lovely Dutch family can be, that always reminds me, my Chinese family. Thanks for all happy memories. For Peter, thank you for standing for me all the time. You show to me how kind Dutch can be. Of course, special thanks to my family, thank you for loving me so much.
