The stressed brain

Discovering the neural pathways to risk and resilience

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 10 januari 2017
klokke 15.00 uur

door

Stephanus Johannes August van der Werff

geboren te Pijnacker
in 1985

Promotores

Prof. dr. N.J.A. van der Wee

Prof. dr. B.M. Elzinga

Leden promotiecommissie

Prof. dr. H.G.J.M. Vermetten

Prof. dr. K. Roelofs, *Radboud University Nijmegen*

Dr. S.G. Geuze, *Central Military Hospital, Utrecht University Medical Center*

Table of Contents

Chapter 1	Introduction	9
Chapter 2	Resting-state functional connectivity in adults with childhood emotional maltreatment <i>Psychological Medicine, 2013, 43, 1825-1836</i>	31
Chapter 3	Smaller grey matter volumes in the anterior cingulate cortex and greater cerebellar volumes in patients with long-term remission of Cushing's disease: a case-control study <i>European journal of endocrinology, 2013, 169, 811-819</i>	55
Chapter 4	Widespread reductions of white matter integrity in patients with long-term remission of Cushing's disease <i>Neuroimage clinical, 2014, 4, 649-647</i>	77
Chapter 5	Resting-State Functional Connectivity in Patients with Long-Term Remission of Cushing's Disease <i>Neuropsychopharmacology, 2015, 40, 1888-1898</i>	101
Chapter 6	Neuroimaging resilience to stress: a review <i>Frontiers in behavioral neuroscience, 2013, 7, 39.</i>	127
Chapter 7	Resilience to childhood maltreatment is associated with increased resting-state functional connectivity of the salience network with the lingual gyrus <i>Child abuse and neglect, 2013, 37, 1021-1029</i>	165
Chapter 8	Structural and functional brain correlates of resilience to traumatic stress in Dutch police officers <i>In Preparation</i>	187
Chapter 9	Summary and general discussion	211
Appendix	Nederlandse samenvatting	236
	Curriculum vitae	240
	List of publications	241
	Dankwoord	244
