Intrauterine blood transfusion

Indications, risks, quality control and long-term outcome

Proefschrift

ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op donderdag 10 september 2015

klokke 13.45 uur

door

Irene Theresia Maria Lindenburg

geboren te Schiedam

in 1982

Promotiecommissie

Promotores: Prof. Dr. D. Oepkes

Copromotores: Dr. I. L. van Kamp
Dr. E. Lopriore

Overige leden: Prof. Dr. J.J. Zwaginga
Prof. Dr. E.H.H.M. Rings
Prof. P. Soothill, University of Bristol, United Kingdom

Table of contents

Chapter 1	General introduction and outline of the thesis	9
Chapter 2	Intrauterine bloodtransfusion: current indications and associated risks Fetal Diagnosis and Therapy 2014;36(4):263-71	15
Chapter 3	Increased risk of intravascular intrauterine transfusions for alloimmune anaemia before 20 weeks' gestation British Journal of Obstetrics and Gynaecology 2013;120(7):847-52	33
Chapter 4	Quality control for intravascular intrauterine transfusion using cumulative sum (CUSUM) analysis for the monitoring of individual performance Fetal Diagnosis and Therapy 2011;29(4):307-14	49
Chapter 5	Long-Term follow up after intra-Uterine transfusions; the LOTUS study BMC Pregnancy Childbirth 2010;10:77	67
Chapter 6	Long-term neurodevelopmental outcome after intrauterine transfusion for haemolytic disease of the fetus/newborn; the LOTUS study American Journal of Obstetrics and Gynecology 2012;206(2):141.e1-8	83
Chapter 7	Intrauterine transfusion for Parvovirus B19 infection: long-term neurodevelopmental outcome American Journal of Obstetrics and Gynecology 2012;206(3):204.e1-5105	103
Chapter 8	Long-term neurodevelopmental and cardiovascular outcome after intrauterine transfusions for fetal anaemia: a review Prenatal Diagnosis 2013;33(9):815-22	115
Chapter 9	Summary, general discussion and future research perspectives	135
Chapter 10	Samenvatting	153
