The research presented in this thesis was performed at the Department of Pediatrics, Leiden University Medical Center, The Netherlands

Publication of this thesis was financially supported by the Willem-Alexander Children's Hospital of the Leiden University Medical Center, J.E. Jurriaanse Stichting, Fisher & Paykel Healthcare, Bronovo Hospital the Hague, Laerdal Benelux B.V., Regionale Ambulance Dienst Hollands-Midden, Sectra.

Improving neonatal resuscitation at birth: technique and devices

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 15 februari 2012
klokke 16.15 uur

door

Kim Schilleman

geboren te Rotterdam in 1986

Promotiecommissie

Promotor Prof. dr. F.J. Walther

Co-promotor Dr. A.B. te Pas

Overige leden Dr. K. Bohlin
Karolinska University Hospital/Karolinska Institutet, Stockholm, Sweden

Dr. A.H.L.C. van Kaam
*Emma Children's Hospital, Academic Medical Center, Amsterdam,
the Netherlands*

Prof. dr. J.M.M. van Lith

Prof. dr. M. Vento
University and Polytechnic Hospital La Fe, Valencia, Spain

Prof. dr. J.M. Wit

Prof. dr. L.J.I. Zimmerman
Maastricht University Medical Centre, Maastricht, the Netherlands

Voor mijn ouders en RobbertJan

Contents

Chapter 1	General introduction, aim and outline of the thesis	9
	Part 1 – Technique of neonatal resuscitation at birth	19
Chapter 2	Leak and obstruction with mask ventilation during simulated neonatal resuscitation	21
Chapter 3	Variability in the assessment of ‘adequate’ chest excursion during simulated neonatal resuscitation	35
Chapter 4	Compressive force applied to a manikin’s head during mask ventilation	47
Chapter 5	Evaluating manual inflations during mask ventilation of preterm infants at birth	61
Chapter 6	Breathing during mask ventilation of preterm infants at birth	75
	Part 2 – Devices for neonatal resuscitation at birth	89
Chapter 7	Low versus high gas flow rate for respiratory support of infants at birth: a manikin study	91
Chapter 8	Changing gas flow during neonatal resuscitation: a manikin study	105
Chapter 9	Auditing resuscitation of preterm infants at birth by recording video and physiological parameters	119
Chapter 10	General discussion - Neonatal resuscitation at birth: technique and devices	133
Chapter 11	Summary	155
Appendix	Nederlandse samenvatting	164
	List of abbreviations	170
	Authors and affiliations	171
	Dankwoord (Acknowledgements)	172
	Publications	174
	Curriculum Vitae	175
