Genetic Disorders in the Growth Hormone – IGF-I Axis

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 8 november 2007
klokke 16.15 uur

door

Maria Josephina Elisabeth Walenkamp

geboren te Haarlem
in 1966

Promotiecommissie

Promotor	Prof. dr. J.M. Wit
Copromotores	Dr. A.M. Pereira Dr. M. Karperien
Referent	Dr. C. Camacho-Hübner (University of London)
Overige leden	Prof. dr. S.L.S. Drop (Erasmus Universiteit Rotterdam) Prof. dr. J.A. Romijn

If you can look into the seeds of time,
and say which grain will grow and which will not.....

William Shakespeare, *Macbeth*, Act 1 Scene 3

*Aan mijn ouders,
Xavier, Fleur en Emilie*

Table of contents

Chapter 1	General introduction	9
Chapter 2	Genetic disorders in the Growth Hormone – Insulin-like Growth Factor-I axis. <i>Hormone Research 2006;66:221-230</i>	21
Chapter 3	Large height gain by growth hormone therapy in combination with GnRH analog in two pubertal sibs with a GH-releasing hormone receptor mutation. <i>Submitted</i>	39
Chapter 4	Clinical and biochemical characteristics of a male patient with a novel homozygous STAT5b mutation. <i>The Journal of Clinical Endocrinology and Metabolism 2006; 91(9): 3482-3485</i>	51
Chapter 5	Growth hormone secretion and immunological function of a male patient with a homozygous STAT5b mutation. <i>European Journal of Endocrinology 2007;156(2):1-12</i>	63
Chapter 6	Homozygous and heterozygous expression of a novel Insulin-like Growth Factor-I mutation. <i>The Journal of Endocrinology and Metabolism 2005;90(5):2855-2864</i>	85
Chapter 7	Structural and functional characteristics of the Val ⁴⁴ Met Insulin-like Growth Factor-I missense mutation: correlation with effects on growth and development. <i>Molecular Endocrinology 2005;19(3):711-721</i>	109
Chapter 8	A variable degree of intrauterine and postnatal growth retardation in a family with a missense mutation in the Insulin-like Growth Factor I receptor. <i>The Journal of Endocrinology and Metabolism 2006;91(8):3062-3070</i>	141

Chapter 9	Successful long-term growth hormone therapy in a girl with haploinsufficiency of the IGF-I receptor due to terminal 15q26.2->qter deletion. <i>Submitted</i>	163
Chapter 10	General discussion Genetic disorders in the GH-IGF-I axis in mouse and man. <i>European Journal of Endocrinology 2007;157(suppl 1):S15-S26</i>	179
Chapter 11	Summary	209
Chapter 12	Samenvatting	215
